# IMPORTANT

For installation of room sealed and forced flue boilers and water heaters, use Ferroli original flue gas kits and accessories. Whenever original flue gas accessories are not used, Ferroli will not be held liable in case of anomalies that could jeopardise the function and safety of the system.

This document includes international standard products and codes. Some products and accessories may differ or not be available in particular geographical areas. For product and code confirmation, commercial conditions, delivery time and eventual minimum lots etc, please refer to Ferroli's commercial rapresentatives. Application of accessories to be checked on respective installation manuals.

CERTIFIED QUALITY SYSTEM

# **KEY OF SYMBOLS**

Products for replacement with identical model only (restiction valid only in the EU)

Equipment fitted with low consumption high modulating efficiency circulator (Erp Ready - Class A)

You can **delay burner ignition** by starting it up only when domestic hot water is actually drawn

**PRODUCT FOR EXTRA EU MARKETS ONLY.** Product not admitted in the EU (can only be sold and installed in the EU if firstly introduced in the EU market before 26 September 2015).

Ultra high performing "Blue Forever" electrical heating elements featuring a special surface treatment that almost entirely reduces limescale build-up

This equipment is designed specifically to offer **particularly simple** installation and maintenance

**Remote control** of boiler parameters via remote control (ROMEO)

**Stainless steel** high performance bivalent **primary exchanger** 

F.P.S: Flue gas Protection System. The check valve offers easy connection to pressurised collective flue systems (ex. in restructuring), in accordance with regulation UNI 7129

The equipment is only suitable for operation in **indoor locations** 

Stainless steel high performance mono-thermal primary exchanger

MC<sup>2</sup>: Multy Combustion Control, new combustion system with patented gasadaptive technology

Suitable for operation **outdoors** with a minimum temperature of **-T1°C for the standard version** and, if fitted with the antifrost kit, even **-T2°C** 

Stainless steel exchanger Patented AISI 316 TI

M.G.R: Methane, Lpg, Propane-air Ready, with a simple configuration the boiler can run on natural gas, lpg without the use of any additional conversion kits

Suitable for operation **outdoors** with a minimum temperature of **-T1°C for the standard version** and, if fitted with the antifrost kit, even **-T2°C** 

The device is suitable to be combined with traditional **high temperature** systems; it cannot be combined or installed with direct delivery to systems with low temperature radiant panels

Approved for operation with **50mm** diameter flue gas discharge

Appliance certified as **"range rated"** according to EN 483

Appliance can be combined with preheating systems for the domestic hot water

**Antifrost function,** if gas and power supplied

Electronics features built-in **master-slave cascade** operation, without additional controllers

Generator equipped with devices to facilitate handling during shipping and installation

Minimum polluting emissions (class 6 according to EN 15502-1) already in compliance with the requirements of the ErP directive of 26.09.2018 (NOx emissions < 56mg/kWh)

Possible connection to an optional outdoor probe, thus enabling system flow temperature compensation

Generator equipped with devices to **facilitate handling** during shipping and installation

Modulating ratio between **Pmax** and **Pmin** 

It reaches one of the highest seasonal room heating efficiencies in its category:  $\eta_s$  94%

Simplified electric wiring with direct access to the external connection terminal board available on the lower part of the device

Exclusive integrated Ferroli
"Thermobalance"
combustion cell

# PRODUCT COMPLIANT WITH ERP (ECODESIGN - LABELLING) REGULATIONS

- Minimum efficiency for DHW/heating (of 26/09/2015) Minimum efficiency for pump (of 01/08/2015)

# ELIX MAXIMA WALL HUNG CONDENSING BOILERS INSTANTANEOUS DHW PRODUCTION

### > STRENGTHS:

- Aesthetics with exclusive lines (Patent) that radically remodel the aesthetic concept by using tempered crystal and having curved shapes
- Wide range of optional accessories available: kit remote control Wi-Fi CONNECT controlled via App, hydraulic connection kit (5 pipes, 4 valves), fitting cover casing
- Boiler with extra thick stainless steel primary exchanger, with large passes guaranteeing duration and reduced maintenance
- High head, enhanced modulating heating circulator on all models also able to adapt to particularly resistant systems
- Low consumption modulating pump (ErP Ready Class A)
- Standard semi-automatic system electro-charging
- Enhanced DHW exchanger with high number of plates, particularly immune to clogging and able to maintain constant DHW production capacity over time
- IMPASSION : being combined with the **CONNECT** modulating remote control, and the outdoor temperature reading directly from the internet, it reaches the maximum energy efficiency A+(scale from G to A+++)
- It easily adapts to the load conditions thanks to the broad modulating range that can reach 1:12 (mod. 34C, 1:10 mod. 28C)
- Ready to operate with natural gas mixtures enriched with hydrogen
- MC2: Multi Combustion Control, new combustion system with gas-adaptive patented technology for better adaptability of use to the varying gas mains conditions
- M.G.R: Methane, LPG, Propane-air Ready with a simple configuration the boiler can run on natural gas, LPG without the use of any additional conversion kits
- Exclusive exchanger-burner system with self-cooling door: it simplifies maintenance and lowers the cost thanks to a lower number of parts that need replacing

### > ADVANTAGES OF BLUEHELIX MAXIMA:

- 7" colour touch-screen graphic display
- Prompt display of the operation status thanks to the front multicolour LED
- Designed to simplify and make normal maintenance and cleaning steps easier thanks to easy access to the internal parts
- Simplified electric wiring that does not require removing the boiler's casing thanks to direct access to the external connection terminal board available on the lower part of the device.

# BLUEHELIX TECH RRT C WALL HUNG CONDENSING BOILERS INSTANTANEOUS DHW PRODUCTION

- Careful design of aesthetics and silent operation, it maintains the legacy of appreciation of the previous "Bluehelix" series
- Boiler with high thickness stainless steel primary exchanger, with large passes (the largest in the category) guaranteeing duration and reduced maintenance, it maintains high efficiency even on old systems with oxidation and soiling
- MC<sup>2</sup>: Multi Combustion Control, new combustion system with industrial-derived gas-adaptive
  patented technology for better adaptability of use to the varying gas network conditions (ex. pressure
  fluctuations or drops)
- M.G.R: Methane, LPG, Propane-air Ready with a simple configuration the boiler can run on natural gas, LPG without the use of any additional conversion kits
- Exclusive exchanger-burner system with self-cooling door: it simplifies maintenance and lowers the cost thanks to a lower number of parts that need replacing
- Instantaneous production of domestic hot water with a dedicated DHW plate exchanger
- Hydraulic fittings covered by the boiler jacket
- Large multi-purpose backlit graphic display to set parameters easily and correctly
- By-pass with standard supply

### > ADVANTAGES OF BLUEHELIX TECH RRT C:

- Particularly suitable for operation in flues requiring "heavy duty" pipes thanks to approval for operation with flue gas discharge with a diameter of 50mm
- F.P.S: Flue gas Protection System. The flue gas check valve provided by standard offers easy
  connection to pressurised collective flue systems (ex. in restructuring), in accordance with regulation
  IINI 7129
- Designed to simplify and facilitate normal maintenance and cleaning operations
- Solar system set up: set up for the production of domestic hot water combined with solar panel systems
- STOP AND GO: you can delay burner ignition by starting it up only when domestic hot water is actually drawn
- Certified 3-star comfort in DHW production mode in accordance with EN 13203
- Minimum polluting emissions (class 6 according to EN 15502-1)
- Sliding temperature operating mode through outdoor probe (optional)
- Low consumption modulating heat pump (ErP Ready Class A)
- **Digital flame control** with three ignition tries if operation gets blocked due to failed flame detection (natural gas mod.)
- Place of installation: also outdoors, in a partially protected place down to -5°C by standard and even -15°C with the addition of the optional antifrost heating elements kit

# BLUEHELIX ALPHA

# WALL HUNG CONDENSING BOILERS INSTANTANEOUS DHW PRODUCTION

### > STRENGTHS:

- Boiler with single-circuit stainless steel primary exchanger without joints and/or welding, it maintains high efficiency even in old systems.
- MC<sup>2</sup>: Multi Combustion Control, new combustion system with gas-adaptive patented technology of industrial origin for better adaptability of use to the varying gas mains conditions (e.g. pressure fluctuations or drops)
- M.L.R: Methane, LPG, Propane-air Ready with a simple configuration the boiler can run on methane, LPG and propane-air without using additional conversion kits
- Instantaneous production of domestic hot water with a dedicated DHW plate exchanger
- User interface with display and multi-purpose keys to adjust and set the parameters
- Bypass as per standard

### > ADVANTAGES OF BLUEHELIX ALPHA:

- Solar system set-up: set up for the production of domestic hot water combined with solar panel
- Flue ducting: particularly suitable for operation in flues requiring "heavy duty" pipes thanks to approval for operation with 50mm diameter flue outlets.
- Minimum polluting emissions (class 6 according to EN 15502-1)
- Sliding temperature operating mode through outdoor probe (optional)
- Low consumption modulating circulator (ErP Ready Class A)
- WILL AT SYSTEM : (for mod. 28C and 34C) combined with the modulating remote control CONNECT, it reaches the top efficiency class A+ (scale from G to A+++)
- User interface with display and multi-purpose keys to adjust and set the parameters
- **Digital flame control** with three ignition attempts if operation gets blocked due to failed flame detection (methane mod.)
- Place of installation: also outdoors, in a partially protected place down to -5°C as per standard and even -15°C with the addition of the optional antifreeze heaters kit
- Removable **casing** into three pieces for easier maintenance or inspection.
- F.P.S.: Flue gas Protection System. The optional flue gas accessory (041106X0 Exhaust gas check valve kit), which can be installed outside the boiler, allows an easy connection to pressurised collective flue systems (e.g. in restructuring), in accordance with the UNI 7129 standard.

**NOTE:** the kit cannot be used in recessed installations.

# DIVACONDENS D PLUS WALL HUNG ATMOSPHERIC CONDENSING BOILERS, WITH INSTANTANEOUS DHW PRODUCTION - LOW NOX

### > STRENGTHS:

- Condensing boiler to heat **high temperature systems** and for domestic hot water production. It is not suitable to be directly connected to underfloor systems, use of mixng valves
- Primary heat exchanger with a compact shape
- Instantaneous production of domestic hot water with a dedicated plate exchanger
- Flue recovery facility of the latent condensation heat. Pre-heats system return before primary exchanger
- Boiler with a watertight chamber and forced draught, with low NOx emissions atmospheric burner, stainless steel
- Standard hydraulic **by-pass**
- High efficiency and low consumption circulator (ErP Class A) with block protection system by being activated for a few seconds every 24 hours of inactivity
- Can be combined with the modulating remote control
- Simple and complete control panel, user interface with display and setting keys

### > ADVANTAGES OF DIVACONDENS D PLUS:

- Robust post-condenser supplied by the closed circuit of the primary, namely with no external mains water inlet. The heat exchange with the flue gas takes place inside large diameter water
- Generator of simple and rational operation
- **Condensate collection device** that protects the air pressure switch, for regular combustion even in very harsh outdoor temperatures
- ECO function in domestic mode for more savings when hot water is not really used
- Solar system set up: set up for the production of domestic hot water combined with solar panel
- Place of installation: also for outdoor use in a partially protected place that is up to -5°C, as standard

# HELIX TOP RRT K 50 CONDENSING WALL HUNG BOILER, STAINLESS STEEL DHW STORAGE TANK

### > STRENGTHS:

- Boiler with high thickness stainless steel primary heat exchanger, with large passes (the largest in the category) guaranteeing duration and reduced maintenance, it maintains high efficiency even on old systems with oxidation and soiling
- MAY SYSTEM: combined with the modulating remote control and the external probe (optional) it reaches the top efficiency class A+ (scale from G to A+++)
- It easily adapts to the load conditions thanks to the **broad modulating range** that can reach **1:12** (mod. 34, 1:10 mod. 28)
- MC<sup>2</sup>: Multi Combustion Control, new combustion system with industrial-derived gas-adaptive patented technology for better adaptability of use to the varying gas network conditions (e.g. pressure fluctuations or drops)
- M.G.R: Methane, LPG, Propane-Air Ready with a simple configuration the boiler can run on methane, LPG and propane-air without the use of any additional conversion kits
- Exclusive exchanger-burner system with self-cooling door: it simplifies maintenance and lowers the cost thanks to a lower number of parts that need replacing.
- DHW production with 50-litre stainless steel storage tank
- Set-up for **recirculation fittings** (provided with the accessory: fitting connection kit)
- Hydraulic fittings covered by the boiler shell
- Large multi-purpose backlit graphic display to set parameters easily and correctly
- Bypass as per standard

### > ADVANTAGES OF BLUEHELIX TOP RRT K 50:

- Particularly suitable for operation in flues requiring "heavy duty" pipes thanks to approval for operation with 50mm diameter flue outlets
- F.P.S: Flue gas Protection System. The flue gas check valve provided as per standard offers easy connection to pressurised collective flue systems (e.g. in restructuring), in accordance with regulation UNI 7129
- Designed to simplify and make normal maintenance and cleaning steps easier
- Antilegionella function with programmable timing
- Timed block protection for circulator and three-way valve
- **Certified 3-star comfort in DHW production mode** in accordance with EN 13203
- Sliding temperature operating mode through external probe (optional)
- Low consumption modulating heat pump (ErP Ready Class A)
- Digital flame control with three ignition tries if operation gets blocked due to failed flame detection (methane

# BLUEHELIX TECH S 45 H WALL HUNG CONDENSING BOILERS, HEATING ONLY

# > STRENGTHS:

- Boiler body with high thickness stainless steel primary exchanger
- Stainless steel full pre-mixing burner
- Digital control **panel**
- Electronic flame modulation in heating and in DHW
- Can be combined with the **modulating** remote **control**
- Large multi-purpose backlit graphic display to set parameters easily and correctly
- By-pass with standard supply
- Elegant design and compact size
- Outer casing coated with white anaphoresis epoxy powders

# > ADVANTAGES OF BLUEHELIX TECH \$ 45 H:

- ECO function in domestic mode for more savings when hot water is not really used
- **Sliding temperature operating mode** through outdoor probe (optional)
- Minimum polluting emissions (class 6 according to EN 15502-1)
- Low consumption modulating heat pump (ErP Ready Class A)
- Digital flame control with three ignition tries if operation gets blocked due to failed flame detection (natural gas mod.)

# **FORCE W**

# HIGH POWER CONDENSING MODULES FOR CASCADE INSTALLATION

### > STRENGTHS:

- High power condensing thermal module, designed for single installations or in sequence up to 600 kW
- Hydraulic, gas and flue gas accessories for cascade installation, with 2, 3 and 4 modules
- Pre-assembled **heat exchanger with elements in aluminum-silicon** alloy engineered for the maximum efficiency and minimum pressure drops on the water circuit
- Total pre-mixing unit, for a micro-flame combustion with very low polluting emissions (Class 6 according to EN 15502-1). The metal micro-fiber burner can run on Natural gas or LPG
- Generator protection systems:
- \* Double sensor (delivery and return) system to operate at constant  $\Delta T$  (from 0 to 60°C)
- \* Exchanger overtemperature protection sensor calibrated to 95°C
- \* Flue gas safety sensor
- \* Water pressure switch with minimum limit of 0,8 bar
- Hydraulic unit (supplied as accessory) with three-way valve for discharge into the atmosphere and a no-return valve. It's possible choosing between two circulators, standard and high head
- Air / Flue gas circuit with intake in the installation room and check valve on the flue gas ejection duct to design the pressurised manifold

# > ADVANTAGES OF FORCE W:

- Master / Slave cascade management with self-configuration system and possibility of setting the on/off sequence of the single generator.
- The electronic control on board is design to manage a double system zone and one DHW storage. In combination with the regulator FZ4 B the boiler can manage different temperature zone (direct and mixed)
- **Range Rated certified** generator to adjust the generated power to the system's needs by increasing the efficiency of the system and preserving the mechanics of the machine.
- The modules can be controlled and conducted remotely:
- \* Power or temperature adjustment with **0 10V signal**
- \* Blocking alarm signal for safety and to restart operation
- \* Opentherm (OT) and Modbus communication protocols with settable parameters

<sup>\*</sup> FORCE W modules are supply without hidraulic kit and circulator.

# FORCE W COMPONENTS DESCRIPTION

- 1 Pre-mixing unit
- 2 Burner
- 3 SILENCER The combustion unit can operate with Methane, LPG and Propane air with conversion kits that can be installed by authorised service technicians. The pre-mixing unit, combined with the low NOx microflame burner, has allowed for the Class 6 certification of the generator in accordance with UNI 15502-1

- 4 Aluminium heat exchanger in AL/Si alloy single block obtained by die-casting. The water passages inside the heat exchanger are particularly wide to ensure low pressure drops. Completely wet combustion chamber integrated in the casting
- 5 Condensate collection manifold
- 6 Condensate discharge
- 7 Flue gas safety sensor 110°C

- SWING CHECK VALVE A thermostat calibrated at 110°C has been installed on the flue gas manifold to ensure perfect operation of the flue gas exhaust together with a swing check valve with a gravity damper that prevents flue gas return into the boiler. Appliances provided with this device enable design engineers to size the pressurised flue gas channel
- 9 Water pressure switch min 0.8 bar
- System delivery temperature sensor
- 11 System return temperature sensor
- 12 HEAT EXCHANGER OVER-TEMPERATURE SAFETY SENSOR
  The heat exchanger's operating temperature is checked by
  three independent sensors that are positioned in three different
  detection points. This ensures maximum safety during
  operation and protects the heat exchanger, increasing its
  service life.
- 13 Pressure gauge (the pressure can also be read on the display)
- 14 Boiler drain cock
- 15 Air bleed valve
- 16 Combustion analysis outlet
- 17 Safety valve 6 bar
- M System delivery ø 1' 1/2
- R System return ø 1' 1/2
- G Gas inlet ø 1'
- Flue gas outlet ø 100

<sup>\* \*</sup> Flue gas accessories certified for installation in a utility room or in a protected place

# FORCE W DIMENSIONS AND CONNECTIONS

### CASCADE KIT FITTINGS

- Delivery/return manifolds DN65 PN16
- Gas manifold DN40 PN16
- Condensation drain manifold Ø 40 mm
- Flue gas manifold Ø 200 mm

Ferroli offers a full range of plate heat exchangers made of braze-welded steel for small and medium systems and a type that can be inspected for systems up to approximately 1 MW.

# PHE HEAT EXCHANGERS WITH INSPECTABLE STEEL PLATES

- Stainless steel plate inspectable heat exchangers (AISI 316L), for medium and small power systems
- Single-pass circuit in counter-current with four threaded stainless steel connections (AISI 316)
- Plug-in NBR gaskets (installed without glue or silicones)
- The optional kits of ground support brackets and insulation are available for the entire range
- Ideal for replacing a heat generator in an existing system or to combine it with systems with high flow rates
- Maximum operating pressure: 10 bar - Max operating temperature: 100°C

# **SHE** HEAT EXCHANGERS WITH BRAZE-WELDED STEEL PLATES

- Stainless steel plate heat exchangers (AISI 316L), copper brazed, for medium and small power systems
- Single-pass circuit in counter-current with four threaded stainless steel connections (AISI 304)
- Ideal for replacing a heat generator in an existing system or to combine it with systems with high flow rates
- Maximum operating pressure: 16 bar
- Max operating temperature: 200°C

# FORCE W OUTDOOR INSTALLATION KIT

- Cabinet equipped for installing of the FORCE W boilers outdoors in a single or bank configuration up
- The cabinet can be combined with one of five models from the FORCE W range and one of the two circulators (7 m and 10 m head)
- Standard equipment includes:
- \* Support frame for the FORCE W thermal generator
  \* DN 65 system delivery and return manifolds

- \* DN 40 gas manifold \* Flanged system fittings kit
- \* Condensate collection and drain manifold
- \* Three-way shut-off valve with discharge into the atmosphere
- \* Two-way shut-off valve
- \* Check valve
- \* Gas connection pipe between boilers and manifold with shut-off valve
- All optional kits are available for single or bank installation up to four modules in line.
  The generator combined with the cabinet kit can be installed without any protection against bad weather (IPX5D) and down to temperatures of -5°C

# FORCE W SIZING AND CHOICE PLATE EXCHANGER

Below are some examples of sizing of plate heat exchangers to be combined with FORCE W generators. The choice and testing of the heat exchanger to be used, in relation to the system, is always the responsibility of the customer. The installation technician is in charge of installation

Characteristics and technical data of the PHE plate heat exchangers are in the "System components" section.

# FORCE W CHOICE HYDRAULIC SEPARATOR

The hydraulic separator guarantees the independence between the primary circuit (generator) and the secondary circuit (system) without any disturbance or interference between them. The separator is proposed complete with deaerator, sludge separator and is fully insulated.

# **CHARACTERISTICS:**

Max operating pressure: 6 bar Temperature range: 0 - 100°C Fittings: DN 65 / DN 100

# HYDRAULIC SEPARATOR FOR INSTALLATION UP TO 150 KW

# DIVATECH D LN INSTANT COMBI DOUBLE EXCHANGER WALL-HUNG BOILERS OPEN FLUE NATURAL DRAUGHT - LOW NOX

### > STRENGTHS:

- Primary heat exchanger with compact geometry made entirely of copper
- Instantaneous production of domestic hot water with a dedicated DHW plate exchanger
- **By-pass** with standard supply
- Boiler with a open chamber and natural draught, with low NOx emissions atmospheric burner, stainless steel
- High efficiency and low consumption circulator (ErP Class A) with block protection system by being activated for a few seconds every 24 hours of inactivity
- Can be combined with the modulating remote control
- Outer casing coated with white anaphoresis epoxy powders
- Simple and complete control panel, user interface with display and setting keys
- Compact size and reduced weight

### > ADVANTAGES OF DIVATECH D LN:

- Modulating heat input during both heating and production of DHW, managed by a microprocessor electronic card
- ECO/COMFORT system for fast production of DHW
- Adjustable post-circulation after the heating phase
- Solar system set up: set up for the production of domestic hot water combined with solar panel systems

# REPLACEMENT OF BOILERS INSTALLED IN COLLECTIVE CHIMNEYS

In the EU the *new* (redesigned) **DIVATECH D C 24/30 LN "ErP Compliant"** can ONLY be installed as replacement for open flues boilers evacuating through collective chimneys, provided that such installation is also permitted by local laws. In that sense the **new** DIVATECH D C 24/30 LN are deemed to be compliant with ErP, which explicitely allows only for that exception.

### MOD C: OPEN FLUE MOD F: ROOM SEALED

# INSTANT COMBI WALL HUNG GAS BOILER

- Traditional compact wall hung boiler for central heating and domestic hot water
- Monothermic CH exchanger plus DHW stainless steel plates exchanger fed by diverting valve
- Complete and intuitive control board, with autodiagnostic function, featuring backlit display and setting buttons
- Can be connected to **outdoor probe** and **remote control**, as optionals
- Modulating operation both in heating and domestic hot water mode, with adjustable temperature increase slope
- Hydraulic bypass as a standard
- Antifrost function, if gas and power supplied
- Ready for connection to solar systems: integrated management of combined DHW production through boiler and solar system
- Compact dimensions thus enabling installation, also in place where limited space is available
- Available in the LPG version

# ONLY HEATING WALL HUNG BOILER

- Traditional compact wall hung boiler for central heating and verical external DHW cylinder
- CH exchanger plus DHW stainless steel plates exchanger fed by diverting valve
- Built-in electronic management of an eventual external DHW cylinder, fed by the onboard diverter valve
- Can be connected to **outdoor probe** and **remote control**, as optionals
- Complete and intuitive **backlit graphic display** for easy and correct setting of the parameters
- Antifrost function, if gas and power supplied
- Timed antiseize program for pump and diverter valve
- Automatic bypass as standard
- Protection index **IPX5D**, which means excellent electrical protection of the appliance

### **FORTUNA**

Ferroll

- Traditional wall-hung boiler, Instant combi via double exchanger
- Electronic display with buttons and front pressure gauge
- Forced flue. Open flue available
- Large availability of models, themal capacities from 10 to 40 kW  $\,$
- Main functions:
  - \* Anti-seize routine for pump \* 2 levels frost protection
- \* Protection heating slope
- \* IP protection IPX5D

### > KEY

- 1 G3/4" CH water inlet
- 2 G1/2" DHW outlet
- **3** G1/2" (DC) 3/4" Gas inlet (AC)
- 4 G1/2" Tap water inlet
- 5 G3/4" CH water return

## FLUES CHIMNEY ACCESSORIES CONDENSING GAS BOILERS

### 1KWMA56W

1 mt Concentric terminal pipe, Ø 60/100 mm, external PVC, internal PPs. Includes wall gasket.

### 1KWMA58W

1 mt Concentric terminal pipe, Ø 80/125 mm, external PVC, internal PPs. Includes wall gasket.

#### 1KWMA57W

1 mt M-F concentric extension, Ø 60/100 mm, external PVC, internal PPs

### 1KWMA59W

1 mt M-F concentric extension, Ø 80/125 mm, external PVC, internal PPs

### 041051X0

90° M-F concentric bend, Ø 60/100 mm, PPs

### 1KWMA73W

90° M-F concentric bend, Ø 80/125 mm, external aluminium, internal PPs

#### 1KWMA83W

1 mt M-F pipe, Ø 80 mm, PPs

#### 1KWMA01W

90° M-F bend, Ø 80 mm, PPs

### 1KWMA64W

45° M-F concentric bend, Ø 60/100 mm, external PVC, internal PPs

### 1KWMA72W

45° M-F concentric bend, Ø 80/125 mm, external PVC, internal PPs

#### 1KWMA88W

90° M-F bend, Ø 60 mm, PPs

### 1KWMA65W

45° M-F bend, Ø 80 mm, PPs

### 1KWMA70W

Flue or air test point Ø 80 mm (M-F) PPs

### 041000X0

90° M-F bend, Ø 80 mm, PPs, with test point

#### 041049X0

Concentric roof terminal, Ø 60/100 mm, external PVC, internal PPs (\*)

#### 010036X0

Concentric roof terminal, Ø 80/125 mm, external PVC, internal PPs (\*)

## FLUES CHIMNEY ACCESSORIES CONDENSING GAS BOILERS

041050X0

M-F reduction, ø 80/60 mm

1KWMA89W

1m M-F pipe, ø 60 mm

041085X0

90° M-F bend, ø 50 mm

041087X0

Reduction, ø 80/50 mm

### 041086X0

1m extension, ø 50 mm

### 1KWMA81U

Roof tile for flat roofs, PVC Ø 132 mm

### 1KWMA86U

Roof reduction from Ø 125 mm to Ø 80 mm, PVC (For adaption of code 010026X to evacuation chimney only thus closing air inlet)

### 1KWMA82U

Roof tile for sloping roofs, PVC and lead moldable support Ø 132 mm

INCLUDES Ø 132 MM COLLAR (ADJUSTABLE IN HEIGHT) FOR CONNECTION TO FERROLI'S ROOF TILES. ACCESSORIES VALID FOR ROOM SEALED MODELS ONLY

## FLUES CHIMNEY ACCESSORIES TRADITIONAL GAS BOILERS AND WATER HEATERS

### 010012X0

Concentric kit 01007X0 + 1KWMA56A (made by: 90°bend, 1mt terminal pipe, Ø 60/100 mm)

### 1KWMA56A

1 mt concentric terminal pipe, Ø 60/100 mm, external PVC, internal aluminium. Includes wall gasket.

#### 1KWMA66A

1 mt concentric terminal pipe, Ø 60/100 mm, aluminium. Includes wall gasket.

### 1KWMR56A

1 MT concentric terminal pipe, Ø 80/125 mm, aluminium

### 1KWMA56U

1 mt M-F concentric extension, Ø 60/100 mm, external PVC, internal aluminium

### 1KWMR56U

1 mt M-F concentric extension, Ø 80/125 mm, external PVC, internal aluminium

#### 1KWMA81W

90° M-F concentric bend, Ø 60/100 mm, external PVC, internal aluminium

#### 010002X0

90° M-F concentric bend, Ø 80/125 mm, external PVC, internal aluminium

### 1KWMA31W

45° M-F concentric bend, Ø 60/100 mm, external PVC, internal aluminium

### 1KWMA72K

45° M-F concentric bend, Ø 80/125 mm, aluminium

#### 1KWMA08K

1 mt M-F pipe, Ø 100 mm, aluminium

### 1KWMA38A

0,5 mt M-F pipe, Ø 80 mm, aluminium

### 1KWMA70U

90° M-F bend, Ø 80 mm, aluminium, with test point

### 1KWMA82A

90° M-F bend, Ø 80 mm, aluminium

#### 1KWMA04K

90° M-F bend, Ø 100 mm, aluminium

## FLUES CHIMNEY ACCESSORIES TRADITIONAL GAS BOILERS AND WATER HEATERS

### 1KWMA65A

45° M-F bend, Ø 80 mm, aluminium

1KWMA03K

45° M-F bend, Ø 100 mm, aluminium

### 1KWMA02K

90° F-F bend, Ø 80 mm, aluminium

1KWMA01K

45° F-F bend, Ø 80 mm, aluminium

### 1KWMA19K

Reduction nipple for flexible pipe, Ø 72/79 mm, stainless steel AISI 316 L

### 1KWMA16U

Vertical connection,  $\emptyset$  80 mm, aluminium, with test point

### 1KWMA03U

M-F reduction, Ø 80-100 mm, aluminium

### ZB90160540

Flue kit (90° bend and 1 mt pipe) for FORTUNA series

# FLUES CHIMNEY ACCESSORIES UNIVERSAL USE

Accessories valid for room sealed models only

### 1KWMA84A

Wall gasket, Ø 80 mm, silicon

### 1KWMR11A

Wall gasket, Ø 100 mm, silicon

### 1KWMA91A

Wall gasket, Ø 60 mm, silicon

### 1KWMR09A

Wall gasket, Ø 125 mm, silicon

#### 1KWMA85A

Air terminal, Ø 80mm, stainless steel

### 1KWMA14K

Air terminal Ø 100 mm, stainless steel

### 1KWMA86A

Flue terminal,  $\emptyset$  80 mm, stainless steel

### 1KWMA29K

Flue terminal Ø 100 mm, stainless steel

### 1KWMA90A

Flue terminal, Ø 60 mm, stainless steel

### 1KWMA07U

Connection joint, Ø 80 mm, steel

### 1KWMA08U

Connection joint, Ø 100 mm, steel

- **1** ON-OFF
- 2 Winter/Summer mode switch
- 3 Reset switch
- 4 Timing and set switch
- **5** Setting switch
- 6 Floor heating mode
- 7 Setting switch
- 8 Confirm switch
- **9** Heating temperature adjustment
- 10 Hot water temperature adjustment
- **11** Water pressure gauge
- 12 LCD display

### WALL-HUNG ELECTRIC BOILER HEATING ONLY

- **One or three phases** operation
- Output modulation on 6 stages for models  $6 \div 9$ , on 12 steps for bigger models
- Flow temperature compensation through (optional) outdoor probe
- Heating planning through **internal timer** or optional programmable thermostat
- 2 levels antifrost function
- Modular operation through optional cascade controller
- Includes high efficiency pump with anti-seize function, expansion vessel, bypass
- Can manage an external DHW tank
- Wifi/internet control by CONNECT remote control, available as optional
- Available with high efficiency pump (in compliance with Erp regulation) or standard pump for extra-UE countries

### FLOOR STANDING CONDENSING BOILER, FOR HEATING ONLY

### > STRENGTHS:

- It reaches one of the highest seasonal space heating efficiencies in its category:  $\eta_s\,94\%$  (only mod. 35)
- Impact of the outdoor probe (optional) it reaches the top efficiency class A\* (scale from G to A\*\*\*) (only mod. 35)
- Stainless steel primary heat exchanger
- Stainless steel full pre-mixing burner with broad modulating range
- Low consumption modulating heat pump (ErP Ready Class A)
- Digital commands with user interface display, multi-purpose for easily and correctly entering parameters
- Can be combined with the modulating remote control
- Easily accessible hydraulic and gas fittings to facilitate replacing old generators
- Flue gas discharge with spilt or coaxial pipes; possibility of right, left or rear outlet

### > ADVANTAGES OF BLUEHELIX B:

- Minimum polluting emissions (class 6 according to EN 15502-1)
- Sliding temperature operating mode in combination with the optional outdoor probe
- Exchanger protection function with  $\Delta t$  control
- Timed circulator block protection
- **Digital flame control** with three reignition tries if operation gets blocked due to failed flame detection (only in natural gas mode)
- Antifrost function with standard protection down to -5°C

### BLUEHELIX B K 50 FLOOR STANDING CONDENSING BOILER, STAINLESS STEEL DHW STORAGE

### > STRENGTHS:

- It reaches one of the highest seasonal space heating efficiencies in its category:  $\eta_s$  94%
- Implication Combined with the modulating remote control and the outdoor probe (optional) it reaches the top efficiency class A\* (scale from G to A\*\*\*)
- Stainless steel primary heat exchanger
- **Production of domestic hot water** with 50-litre stainless steel storage with fitting for recirculation
- Stainless steel full pre-mixing burner with broad modulating range
- Low consumption modulating heat pump (ErP Ready Class A)
- Digital commands with user interface display, multi-purpose for easily and correctly entering parameters
- Can be combined with the modulating remote control
- Easily accessible hydraulic and gas fittings to facilitate replacing old generators
- Flue gas discharge with spilt or coaxial pipes; possibility of right, left or rear outlet

### > ADVANTAGES OF BLUEHELIX B K 50:

- Minimum polluting emissions (class 6 according to EN 15502-1)
- Sliding temperature operating mode in combination with the optional outdoor probe
- Certified 3-star comfort in DHW production mode in accordance with EN 13203, set forth by Reg. 812/2013
- Exchanger protection function with  $\Delta t \ \text{control}$
- Timed block protection for circulator and three-way valve
- Digital flame control with three reignition tries if operation gets blocked due to failed flame detection (only in natural gas mode)
- Antifrost function with standard protection down to -5°C

### HELIX B S K 100 FLOOR STANDING CONDENSING BOILER, STAINI FSS STEEL DHW/ STORAGE

### > STRENGTHS:

- It reaches one of the highest seasonal space heating efficiencies in its category:  $\eta_s$  94%
- IMILAY SYSTEM: combined with the modulating remote control and the outdoor probe (optional) it reaches the top efficiency class A+ (scale from G to A+++)
- Stainless steel primary heat exchanger
- **Production of domestic hot water** with 100-litre stainless steel storage with fitting for recirculation and front flange for inspection and maintenance
- Stainless steel full pre-mixing burner with broad modulating range
- low consumption high efficiency modulating circulator (ErP Ready class A)
- Digital commands with user interface display, multi-purpose for easily and correctly entering parameters
- Can be combined with the modulating remote control
- Easily accessible hydraulic and gas fittings to facilitate replacing old generators
- Flue gas exhaust with split or coaxial pipes

### > ADVANTAGES OF BLUEHELIX B S K 100:

- Minimum polluting emissions (class 6 according to EN 15502-1)
- Sliding temperature operating mode in combination with the optional outdoor probe
- Certified 3-star comfort in DHW production mode in accordance with EN 13203, set forth by Reg. 812/2013
- Exchanger protection function with  $\Delta t$  control
- Timed block protection for circulator and three-way valve
- Digital flame control with three reignition tries if operation gets blocked due to failed flame detection (only in natural gas mode)
- Antifrost function with standard protection down to -5°C

### OPERA CONDENSING THERMAL GENERATOR FOR LARGE VOLUME OF WATER

### > STRENGTHS:

- High power condensing thermal module with large water content, designed for single or cascade installations, in combination with a complete range of water, gas and flue gas accessories, up to 960 kW
- Hydraulic, gas and flue gas accessories for cascade installation with 2 and 3 modules
- Flue gas tube heat exchanger, made with **AISI 316 Ti** stainless steel, with vertical configuration, helical cross-section, set up perpendicularly to the flue gas chamber
- Full pre-mixing combustion unit with metal fibre front combustion burner with very low emissions (CLASS 6 according to EN 15502-1). The modules can run on natural gas and LPG
- The combustion chamber has an extremely contained overall vertical dimension so that the exchange of water/flue gases can take place over the entire extension of the exchanger
- **Generator protection systems:** Double sensor (delivery and return) system for operation at  $\Delta T$  **constant** (adjustable up to 60°C) / Flue gas safety sensor / Water pressure switch with minimum threshold at 0.8 bar
- Air / Flue gas circuit with intake in the installation site and check valve integrated on the intake unit to size the pressurised flue gas manifold
- Control panel protected by a door built into the outer casing with key lock
- Four heavy-duty floating wheels fitted per standard to facilitate unloading and mobility inside the thermal power plant. Adjustable feet for positioning

### > ADVANTAGES OF OPERA:

- It reaches one of the highest seasonal space heating efficiencies in its category: n. 94%
- Impact Combined with the modulating remote control and the outdoor probe (optional) it reaches **the top efficiency class A**+(scale from G to A+++)
- The **large volume of water** of the generator allows the boiler to be connected to the system without the need for separating devices and allows for a **very high design**  $\Delta t$
- Management of the modules in cascade set-up with self-configuring **MASTER / SLAVE system**
- Setting of switching on and off of generators (which can be switched on and off in sequence or work simultaneously in parallel) through the control panel of the MASTER generator
- Electronics on board the machine to manage a system with two direct zones and one DHW storage or systems with differentiated temperatures (direct and mixed) in combination with the FZ4 B temperature control unit
- RANGE RATED certified generator to adjust the generated power to the system's needs by increasing the efficiency of the system and preserving the mechanics of the machine
- The modules can be controlled and conducted remotely: Regulation of power or temperature with
   0 10V signal / Signalling of block alarm for safety and restoration of operation / OPENTHERM
   (OT) and MODBUS parameterisable communication protocols
- Electronic control of microprocessor combustion allows 1/5 modulation on the single generator and of the 1/15 for the maximum configuration (3 x 320 modules in cascade set-up)

### OPERA INSTALLATION IN A BANK

It is possible to connect in cascade a minimum of two 70 kW generators to a maximum of three 320 kW generators, in the combinations shown in the table.

### Every detail of the OPERA range has been designed to simplify cascade installations.

- The hydraulic connections have been positioned at the same heights to simplify connection to the system delivery and return manifolds.
- The satellite flue gas outlet with respect to the generator body and the backflow prevention damper positioned directly on the fan facilitate sizing and implementation of the flue gas manifold (pressurised).
- Coupled with a complete series of accessories for several two or three-generator bank combinations, reaching a maximum output of 960 kW.
- The electronics fitted as per standard was designed to autonomously manage the dynamics of several generators in cascade, with MASTER-SLAVE logic, up to a max. of 6.
- By setting the parameters of the cascade MASTER board, the ignition and shutdown sequence of the various modules can be set and rotated so as to evenly divide the number of operating hours.

### **TP3 COND**

### THREE PASS FLUE CONDENSING GENERATOR

### > STRENGTHS:

- Steel, condensing heat generator with high water content, designed to work in conjunction with gas or oil jet burners.
- **Boiler with three flue gas passes**, with return pipe from the bottom of the combustion chamber
- Floating combustion chamber with wet bottom, low volumetric heat load and standard turbulators on the last flue gas pass.
- Front single-piece door equipped with blind flange for securing the burner. All the parts in contact
  with the flue gases are coated with refractory material offering high resistance and thermal insulation.
   Reversible opening (right and left) and closing system and micro-metric adjustment on four
  points.
- **Double return fitting** for low and high temperature systems.
- Contained front overall dimensions to fit the generator through the accessways of thermal power plants.
- **High energy** efficiency
- Maximum operating pressure 6 bar
- Heat transfer fluid circulation control system inside the body to improve exchange and avoid thermal shock
- "Satellite" control panel available in thermostatic version

### **TP3 LN**

### **3-PASS FLUES STEEL BOILER**

- Monobloc generator, **3-pass flues**, **small thermal load**, vertical layout and extremely compact front dimensions. Homologated for systems untill 100°C
- Ready for coupling with jet burners, operating with gas or oil and with low polluting emissions Large combustion chamber with **floating cooled back**
- Flues bundle for second and third flue-pass is situated in the top side of the combustion chamber. Flues tubes protudes from the plate, in order to avoid condensation
- Steel turbolators, increasing thermal efficiency of the generator. They have been carefully designed not to worsen flues pressure drop
- High efficiency. Ranges between 94,7% and 96,3% on LCV (t<sub>avg</sub> 70°C)
   Max operating pressure: 6 bars. Higher pressure specifications upon demand
   Vertical connection are threaded until model 240 and flanged until model 600
- Completely insulated front door and  ${\it reversible opening}$  (right and left), thanks to an innovating mechanism on boiler body, with micrometric adjustment. Equipped with flame inspection hole and test point for combustion chamber back pressure

\* FOR MODELS 70÷399, IN EUROPEAN COMMUNITY CAN BE SOLD ONLY AS A REPLACEMENT OF AN IDENTICAL MODEL

### **PREXTHERM RSW**

### **PRESSURISED STEEL BOILER**

- Front door with double layer of insulation and reversible opening (right and left) and door centering in a unique mechanism
- Carefully designed with a system optimising fluid circulation inside the boiler, thus improving thermal exchange and minimising stress on the materials
- Max operating pressure: 6 bar. Higher pressure specifications upon demand
   Models 92 N ÷ 401 N are available with a standard kit of connection flanges in the supply

\* FOR MODELS 92÷350, IN EUROPEAN COMMUNITY CAN BE SOLD ONLY AS A REPLACEMENT OF AN IDENTICAL MODEL

<sup>\*\*</sup> Including water connections

### THERMOSTATIC CONTROL BOARD FOR STEEL PRESSURISED GENERATORS

### > THE ADVANTAGES:

- Can be combined with single-stage and two-stage jet burners
- Double contact regulation thermostat
- Anticondensation function with minimum threshold for starting the adjustable pump
- Set-up for the installation of a temperature control

### > KEY

IG Main switch

**SB** Blocked burner light

TRC Adjustment thermostat

**TS** Safety Reset / Thermostat

6 Thermometer

7 Temperature control set-up (not supplied)

### CODE DESCRIPTION

0Q2K10XA THERMOSTATIC CONTROL BOARD

### ATLAS D ECO COND UNIT CONDENSING LOW NOX OIL BOILER

### > STRENGTHS:

- Boiler body in cast iron G20 and preassembled elements with steel double cones and tie rods
- **High efficiency flue gas post condenser** in stainless steel AISI 2205
- Completely wet combustion chamber
- Complete with single stage light oil burner with low pollutant emissions
- Control panel with large interface display and easy and intuitive parameter setting keys
- **Including** heating pump, expansion vessel, 3 bar pressure relief valve and water pressure switch
- Outer casing in painted steel by epoxy powder anaphoresis and kiln fired at 180°C
- Supplied in a single parcel packed in a wooden box complete with filter and oil line connection hoses

### > ADVANTAGES OF ATLAS D ECO COND UNIT:

- Sliding temperature operating mode with outdoor probe (optional)
- External domestic hot water storage tank managed by control electronics
- Can be combined with the remote control timer
- Antifrost system with triggering threshold at 6°C
- Easy access to stainless steel condenser for cleaning and inspection

### ATLAS D ECO COND SI UNIT CONDENSING LOW NOX OIL BOILER INSTANT COMBI

### > STRENGTHS:

- Boiler body in cast iron G20 and preassembled elements with steel double cones and tie rods
- High efficiency flue gas post condenser in stainless steel AISI 2205 with integrated instantaneous domestic hot water production
- Integrated domestic hot water circuit in post condenser complete with flow switch. The system
  favours condensation even in the domestic hot water production phase, providing the generator with a
  high degree of efficiency
- Completely wet combustion chamber
- Complete with single stage oil burner with low pollutant emissions
- Control panel with large interface display and easy and intuitive parameter setting keys
- Heating circuit including pump, expansion vessel, 3 bar pressure relief valve and water pressure switch
- ${\bf Outer\ casing}$  in painted steel by epoxy powder anaphoresis and kiln fired at 180°C
- Supplied in a single parcel packed in a wooden box complete with filter and oil line connection hoses

### > ADVANTAGES OF ATLAS D ECO COND SI UNIT:

- Sliding temperature operating mode with outdoor probe (optional)
- Can be combined with the remote control timer
- Antifrost system with triggering threshold at 6°C
- Easy access to stainless steel condenser for cleaning and inspection

### ATLAS D ECO COND K UNIT CONDENSING LOW NOX OIL BOILER STORAGE COMBI

### > STRENGTHS:

- Boiler body in cast iron G20 and preassembled elements with steel double cones and tie rods
- 130 I storage tank in enamelled steel complete with protection anode
- High efficiency flue gas post condenser in stainless steel AISI 2205
- Completely wet cooled **combustion chamber**
- Complete with single stage oil burner with low pollutant emissions
- Control panel with large interface display and easy and intuitive parameter setting keys
- Complete with heating and DHW pumps, expansion vessels for heating (10 I) and DHW (3 I), 3 bar pressure relief valve and water pressure switch
- **Outer casing** in painted steel by epoxy powder anaphoresis and kiln fired at 180°C
- **Supplied** in a single parcel packed in a wooden box complete with filter and oil line connection hoses

### > ADVANTAGES OF ATLAS D ECO COND K UNIT:

- Sliding flow temperature compensation with outdoor probe (optional)
- Can be combined with the remote control timer
- Antifrost system with triggering threshold at 6°C
- Easy access to stainless steel condenser for cleaning and inspection

### ATLAS D CAST IRON FLOORING STANDING BOILERS, FOR OIL

### > STRENGTHS:

- Heating device designed to operate with jet burners with electric absorption ≤180 W for models 25-37 and ≤200 W for models 50-63-75 or for replacement with identical devices according to current regulations
- Cast iron body, with preassembled elements with steel double cones and tie rods, of the three flue gas pass type with completely wet combustion chamber
- The standard electronics can manage the heating system circulator, the remote timer control or room thermostat, the outdoor probe for flow temperature compensation, the circulator (3-way valve) and storage tank probe for DHW production with external storage
- Key controls and LCD display interface

- **1** 1" 1/2" system flow
- 2 1" 1/2" system return3 Heating system drain
- valve **a5** Burner hole
- **a6** Burner connection
- C Flue gas outlet

### ATLAS D ECO SI UNIT LOW NOX OIL BOILER INSTANT COMBI

### > STRENGTHS:

- Floor-standing boiler for heating and instantaneous domestic hot water production, complete with low pollutant emissions oil burner
- Cast iron body, with preassembled three-pass elements with completely wet combustion chamber
- Standard supply:

Pump and expansion vessel for heating circuit

Motorised three way valve and steel plate heat exchanger for instantaneous DHW production

- The standard electronics can manage:

Remote control timer or room thermostat

Outdoor probe for sliding temperature operating mode

Key-operated controls and interface with a large LCD screen

Preassembled oil burner supplied with filter and oil line connection hoses

- Supplied in a single parcel packed in a wooden box

### ATLAS DECO KUNIT THERMAL UNIT WITH LOW NOX OIL BURNER FOR HEATING AND DOMESTIC HOT WATER PRODUCTION

### > KEY

- A Safety and non-return valve
- A4 Fume outlet
- 10 System delivery - Ø 3/4"
- 11 System return Ø 1"
- **14** Heating safety valve
- 32 Heating circulating pump
- 36 Automatic air vent
- 40 DHW expansion vessel
- **56** Expansion vessel
- 74 System filling cock
- 97 Magnesium anode
- 130 Hot water tank circulating pump
- 143 Hot water tank control thermostat

- 154 Condensate drain pipe
- 178 Hot water tank thermometer bulb
- 179 Non-return valve
- 180 Hot water tank
- 192 Recirculation Ø 3/4"
- 197 Manual air vent
- 209 Hot water tank delivery Ø 3/4"
- 210 Hot water tank return Ø 3/4"
- 233 Hot water tank drain cock
- 246 Pressure transducer
- 275 Heating system drain cock
- 278 Double sensor (Heating + Safety)
- 293 Hot water tank inspection flange
- 295 Burner

### > STRENGTHS:

- Floor-standing boiler for heating and domestic hot water production with storage tank complete with low pollutant emissions oil burner
- Cast iron body, with preassembled three-pass elements with completely wet combustion chamber
- Storage tank in steel and glass-porcelain complete with magnesium protection anode
- Standard supply:

Pump and expansion vessel for heating circuit, circulator for DHW circuit

- DHW expansion vessel and system filling valve supplied in optional kit
- The standard electronics can manage the remote control timer or room thermostat and the outdoor probe for sliding temperature operating mode
- Recirculation circuit connection
- Heating system and storage tank drain valves
- Key-operated controls and interface with a large LCD screen
- Preassembled oil burner supplied with filter and oil line connection hoses
- Supplied in a single parcel packed in a wooden box

### **ATLAS**

### 3 PASS-FLUES BOILER, FOR OIL OR GAS JET BURNER, HEATING ONLY

- High efficiency cast iron boiler body, featuring 3 pass technology, insulated with high density rockwool
- Silent operation thanks to low flues turbulence
- Widely copes with requirements for 2 stars efficiency according to directive 92/42 EEC, emended by Reg. 812/2013
- $\pmb{Conic}$   $\pmb{chimney}$   $\pmb{stack},$  in order to easily adapt to different tolerances of flue pipes diameters
- Analogue control panel with elegant fume cover
- Control board includes thermometer, ignition switch, safety thermostat with manual reset and temperature setting knob
- Stylish steel jacket painted by anaphoresis with epoxy powder

### GN2 N

### CAST-IRON BOILER, SUITABLE FOR INSTALLATION OF AN OIL OR GAS JET BURNER

### > STRENGTHS:

- High efficiency floor-standing heat generator fitted for jet burners on liquid and/or gas fuel, with partial flame reversal and one flue pass, cooled combustion chamber, for the production of hot water for central heating
- G20 cast-iron boiler body made from pre-assembled elements (6÷14) with steel cone inserts and boiler studs, insulated by a layer of rock wool lined by special tear-proof material.
- Control board includes: temperature and pressure gauge, overheat cut-off thermostat, switch on/off test, presetting led for the burner lockout, 2 stages regulation thermostat, lodging for an electronic controller
- Supplied in three boxes:
- 1) boiler body in a wooden crate
- 2) jacket packaged in a cardboard box
- 3) instrument panel packaged in a cardboard box
- Fitted for two-stage burners

#### > KEY

- 1 Ready for electronic control unit
- 2 Thermohydrometer
- 3 Safety thermostat
- 4 Control thermostat, 2nd Stage
- 5 Line switch
- 6 Burner lockout indicator light
- a1 Central heating flow outlet DN80 3"
- a2 Central heating return inlet DN80 3"
- a3 Boiler drain 3/4"

### GN4 N

### CAST-IRON 3 PASS-FLUES BOILER, SUITABLE FOR INSTALLATION OF AN OIL OR GAS JET BURNER

### > STRENGTHS:

- High efficiency heat generator for liquid or gas fuel, three flue passes, cooled combustion chamber, for the production of hot water for central heating, suitable for operation either connected to a traditional system or connected to a low temperature heating system, with a minimum return temperature of 35°C
- G20 cast-iron boiler body made of sections to be assembled when installing the generator in the boiler room

### - Fitted for two-stage burners

 Control board includes: thermometer, safety thermostat, 2 stages thermostat with presetting for indication leds, boiler switch, lodging for eventual flues thermostat and electronic controller

#### CAST IRON ATMOSPHERIC GAS BOILER, **HEATING ONLY, PILOT IGNITION**

- Boiler body made of assembled **G 20 cast iron sections**, generously insulated by a rockwool layer externally lined with tearproof material
- Atmospheric burner in stainless steel with pilot ignition and termocouple
- Analogue control panel protected with a flip cover
- Control board includes thermometer, pressure gauge, ignition switch, safety thermostat with manual reset and temperature setting knob
- Oversize 1" ½ F system flow and return connections
- Steel casing painted white by anaphoresis using epoxy powder paint
   Easy access to combustion assembly and stack, simply removing casing (fixed with quick pressure clips) and respective insulation
- Boiler is supplied packed inside a robust wooden crate

## **PEGASUS D K 130**

#### CAST IRON ATMOSPHERIC GAS BOILER, INCLUDING DOMESTIC HOT WATER ENAMELLED STORAGE TANK

- 3 stars efficiency according to 92/42 EEC emended by Reg. 812/2013 for 30 and 40 models
- 130 ltrs enamelled steel hot water storage
- Digital control panel suitable for connection to opentherm **modulating remote control** and outdoor probe (optionals)
- Evolved digital interface for planning and monitoring of CH-DHW temperatures and advanced features (economy, legionella protection, troubleshooting ect)
- Stainless steel AISI 304 atmospheric gas burner
- Gas valve with adjustable output according to the installation's requirement, thus allowing unchanged combustion quality and excellent performances
- DHW expansion vassel and filling valve are not supplied
- Central Heating frost protection system
- DHW storage tanks are equipped with connection for a recirculation loop, for immediate availability of hot water to the user

# CAST-IRON ATMOSPHERIC GAS BOILER, HEATING ONLY

- Boiler body made of assembled G20 cast iron sections, generously insulated by a rockwool layer externally lined with tearproof material
- Atmospheric burner with AISI 304 steel heads, electronic ignition with intermittent pilot flame and safety device detecting the ionisation current produced by the flame
- Variable heat input, with **two-stages** operation (except model 56)
- Flues collector with semi-integrated antirefouleur and flues test point
- For smaller boilers (56÷107 kW) element with factory name "B.A.G. 21" is used, whereas for higher outputs (119÷289 kW) a bigger element (namely "LS3") is used
- Efficient operation thanks to the large heat exchange surface of the cast-iron section, and the generous insulation of the boiler body
- Possibility to install the modules in cascade with a side-by-side or back-to-back layout
- Steel casing painted white by anaphoresis using epoxy powder paint
- Control board is preset for integration of an electronic controller

# **TORINO**

#### FLOOR-STANDING GAS BOILER WITH STEEL HEAT-EXCHANGER

- Non-volatile boiler. Does not require external electricity connection
- Heat carrier max working pressure 3 bar
- Designed for operation in open and closed heating systems. and for use with forced or natural circulation
- Completed with SIT gas blocks: 7.5-16 kW (SIT 630); 20-30 kW (SIT 710); 35-100 (SIT 820)
- Tube heat exchanger made of an alloy of high-quality cold-rolled steel with a thickness of 3 mm
- IMIT thermometer
- SIT pilot burner
- Gas supply tube for pilot burner with an increased bore of D=6 mm
- RUSIT burners made of heat-resistant stainless steel with improved combustion properties;
- Convenient installation due to bilateral gas supply. Convenient maintenance due to quick-detachable facing panels, special fastening of smoke collector for convenient maintenance of the boiler gas duct
- Possibility to function on liquefied gas. Operation: 15 years
- All the boilers are equipped with a safety system

- 1 Foil insulation
- 2 Draft stabilizer
- 3 Flue gas temperature sensor
- 4 Petal type turbulator
- **5** Heat exchanger (3 mm steel)
- 6 Main burner
- 7 Thermal phial installation tube
- 8 Coolant overheating sensor

# **BIOMASS**

# BOILER EASYFIRE 82 SUN PELLET 83 SUN P N 84 SFL 85

#### **HEATING STOVES**

T 86 AT 87

# **EASYFIRE**

#### **PELLET BOILER**

#### > STRENGTHS:

- Very compact pellet boiler for central heating, including automatic burner
- Steel combustion chamber, fully thermal insulated
- Completely cooled flue pass. Large volumes of the reversal collectors for the best control of the temperature and speed of flues, incorporating steel turbolators

  - Fully inspectable: in addition to the two doors, the flue gas collectors can also be inspected
- at the bottom (through the side and center plugs) and at the top (removing the cover panel)
- Firebox with cast iron grate, designed for optimum distribution of primary and secondary air. Double post-combustion of fumes
- Control panel with a complete interface display and a set of keys for a very easy boiler setting
- Large capacity of the pellet daily stock: 70 kg for models 29 35 39 and 50 kg for models 17 -

#### **BURNER**

4 combustion levels

## **SUN PELLET**

# PELLET THERMAL GENERATOR

#### > STRENGTHS:

- Boiler body with cast iron elements combined with a blown air burner, complete with an auger for loading and a storage container for pellets (180 kg for mod. 3 and 4 and 280 kg for models 5, 6 and 7)
- Cast iron boiler with pre-assembled elements
- Large combustion chamber to guarantee maximum efficiency and the best thermal exchange
- Removable drawer for easy access to ash collection
- Ultra compact blown air pellet burner supplied complete with an automatic loading system consisting of a motor and auger, safety thermostat and system delivery probe.
- The electronic board on the machine can control the boiler/burner system, pellet loading and the
  main elements of a domestic heating system (system circulator, circulator and/or three-way DHW valve,
  system delivery sensor and storage tank, room thermostat or remote programmable thermostat).
- The user interface is characterised by a large display with adjustment keys on the top back of the cover hood, for easy reading and/or adjusting.
- The burner can be adjusted to operate in single-stage or with two type of flame modulation with 5 power levels

**Heat generator consisting of several parts, to be assembled in the installation site.** Cast iron boiler / Burner / Burner holder plate / Loading unit / Pellet tank

# SUN P N PELLET BURNER

#### **STORAGE BOX**

code 096004X0
pellet container of
350 dm³ - approx 280 kg
(provided as a kit requiring
assembly)

code 096002X0
pellet container of
195 dm³ - approx. 180 kg
(provided as a kit requiring
assembly)

#### > STRENGTHS:

- Ultra-compact pellet burner supplied complete with automatic loading system consisting of motor and feed screw
- The electronic board on the machine offers perfect control of the boiler/burner system, pellet loading and the main elements of a domestic heating system (system circulator, circulator and/or three-way DHW valve, system flow sensor and storage tank, room thermostat or remote programmable thermostat)
- The card's microprocessor recognises what system elements are connected and **configures** automatically
- The user interface is characterised by a large display with adjustment keys on the top back of the cover hood, for easy reading and/or adjusting.
- The burner can be adjusted to operate in **single-stage** or with two type of **flame modulation** with 5 power levels.
- As per standard it comes with a flame return safety thermostat calibrated at 85°C
- Flame ignition with electrical heating element and detection with photo-resistor
- Two different types of optional storage boxes are available: 180 kg and 280 kg

# SFL SOLID FUEL GENERATORS

#### > STRENGTHS:

- Cast iron floor-standing heat generator for wood or coke combustion in the basic or pellet version with conversion kit
- G20 cast iron body with preassembled elements, insulated with a layer of fibre glass covered on the
  outside with tear-proof aluminium film
- Large loading door with front access
- Front ash unloading door and removable collection tray
- Manual adjustment damper on the rear flue gas exhaust
- Safety kit for no circulation, set at 95°C (optional)
- Thermostatic adjustment device (adjustable 30°C 90°C) as per standard

#### > ADVANTAGES OF SFL:

- High thermal efficiency guaranteed by the large exchange surface of the cast iron elements and the completely wet combustion chamber
- **Combustion quality** is guaranteed by the air flap opening system controlled by the thermostatic valve

- **NB** The "safety coil kit" is mandatory if the boiler runs on wood or coke. The "safety thermostat kit" is mandatory if the boiler runs on pellets
- (\*) Kit composed of the perforated door and the insulating panel
- (\*\*) Kit composed of the perforated door complete with insulation and safety micro-switch
- (\*\*\*) Referring to wood burning

#### **PELLET HEATING STOVE**

#### > STRENGTHS:

- Pellet heating stove for combination with domestic heating system
- Heating circuit complete with: high efficiency pump, 8-litre expansion valve, system discharging system and 3-bar safety valve
- Flue gas air intake circuit with variable rpm fan downstream of the burner.
- Set up to channel air extraction outdoors. Three possible flue gas outlets: top, rear or side.
- Equipped with automatic cleaning system of the brazier system/brazier holder. Steel flue gas turbulators with manual cleaning mechanism
- Explosion-proof valve as per standard on the combustion chamber, flame non-return thermostat and pallet level signal sensor. Removable ash collection tray
- In addition to the standard functions of the stove, the standard electronics can manage the main components of a thermal system
- Radio control, for remote control, supplied as per standard.

#### > APPROVALS:

- Designed according to standard EN 14785
- ErP A++ class

# PELLET HEATING STOVE WITH DHW STORAGE

#### > STRENGTHS:

- Pellet heating stove for heating and domestic hot water production with 100-litre stainless steel storage tank
- Heating circuit complete with: high efficiency pump, 8-litre expansion valve, system discharging system and 3-bar safety valve
- Flue gas air intake circuit with variable rpm fan downstream of the burner.
   Set up to channel air extraction outdoors. Three possible flue gas outlets: top, rear or side
- Equipped with automatic cleaning system of the brazier system/brazier holder with manual cleaning mechanism
- Explosion-proof valve as per standard on the combustion chamber, flame non-return thermostat.
   Removable ash collection tray
- Radio control, for remote control, supplied as per standard.

# SUN NGX LOW NOX GAS BURNERS SINGLE-STAGE

- Single-stage burners. Very low nox emissions (class 3 ≤ 80 mg/kwh) achieved with a special combustion head
- Operating with natural gas
- Gas train with stabiliser, double valve and filter
- Adjustable combustion head
- External combustion air regulator (mod. SUN NGX35 SUN NGX70), or internal (mod. SUN NGX120 -SUN NGX200)
- Air damper with gravity closure when stopped
- Stabilised ventilation
- Accessories assembly kit and valve sealing control kit

# SUN NGX LOW NOX GAS BURNERS TWO-STAGE

- Progressive two-stage burners (mod. 120 two-stage). very low NOx emissions (class 3 ≤ 80 mg/kwh) achieved with a special combustion head
- Optional continuous modulation operation by applying the module kit (on request)
- Operating with natural gas
- Gas train with stabiliser, double valve and filter
- Adjustable combustion head
- Electric servo control on the air damper and stabilised ventilation
- Adjustment of the gas flow rate through the variable profile cam controlled by the electric servo control
- Accessories assembly kit and valve sealing control kit
- Modulation kit (temperature/pressure) available as optional

# SUN NGX ACCESSORIES

#### > MODULATION KIT

The regulator converts the progressive two-stage operation of the burner into modulating mode. KIT COMPOSED OF: regulator, immersion temperature probe (0°C - 130°C), connection cables to the burner

| CODE     | DESCRIPTION                     |  |  |
|----------|---------------------------------|--|--|
| 094002X0 | TEMPERATURE REGULATOR AND PROBE |  |  |

#### > SEALING CONTROL KIT

Compact valve sealing control system. The device operates according to the principle of pressure creation. The programmer starts up with heat request.

TECHNICAL CHARACTERISTICS: max operating pressure of 500 mbar, 230V - 50 Hz power supply, room temperature of -15 $^{\circ}$ C to +70 $^{\circ}$ C, consent time 10 - 26 sec, can be combined with models SUN EM 20-30-50-70

# ZEFIRO EGO LOW NOX GAS INSTANTANEOUS WATER HEATER NATURAL DRAUGHT - OPEN FLUE

#### > KEY

- A Display of domestic hot water temperature
- **B** Battery level signal
- **C** Burner power/off regulation
- **D** Temperature regulation
- E Burner on symbol

Gas water heater with open chamber and natural draught, with modulating heat power with emission of  ${\bf LOW~NOx~flue~gas}$  -  ${\bf Class~6}$ 

#### > STRENGTHS:

- **Heat exchanger** with copper finned pipes, finished externally with an aluminium rustproof treatment
- Modulating heat input and fine regulation of hot water output temperature
- Display for easy and prompt reading with operation indicators of the device and battery charge. Power and hot water temperature regulation using comfortable ergonomic knobs
- Battery power supply

#### > ADVANTAGES OF ZEFIRO ECO:

- Product sold in Natural gas and LPG version
- Wide range of hot water temperature regulation and power modulation
- Compact **size** and reduced weight

# SKY ECO F LOW NOX GAS INSTANTANEOUS WATER HEATER FORCED DRAUGHT - ROOM SEALED

Gas water heater with sealed chamber, modulating heat power and electronic control of combustion with emission of LOW NOx flue gas - Class 6

#### > STRENGTHS:

- **Heat exchanger** with copper finned pipes, finished externally with an aluminium rustproof treatment
- ECS (Evolved Combustion System): electronic control of combustion and continuous modulating heat input, managed continuously by a microprocessor that ensures maximum water heater efficiency according to the thermal load
- Flue gas output and air inlet that are set via a coaxial pipe 60/100 mm with double 80 mm pipe (air/flue gas). Supply of full accessories for both solutions
- Ideal for installation both indoors and outdoors, in a partially protected place (standard minimum -5°C and down to -15°C with the optional antifrost heating elements kit)
- Simple and intuitive key controls to adjust the water temperature and large display for easy, prompt reading
- Set up to operate with solar panel systems

#### > ADVANTAGES OF SKY ECO F:

- Product sold in Natural gas and LPG version
- Wide range of hot water **temperature regulation** and **power modulation**
- Compact size , reduced weight and highly functional internal layout of the device in order to facilitate maintenance

#### > KEY

- A Key to increase the domestic hot water temperature
- **B** Key to decrease the domestic hot water temperature
- **C** Service Tool connection
- **D** OFF symbol
- E DHW operation symbol
- F Reset key
- G Device on/off key
- **H** Multifunction symbol
- I Burner on symbol and current power level (Flashing during faulty combustion)

#### **INSTANTANEOUS GAS WATER HEATER, OPEN FLUE, ELECTRONIC IGNITION**

- Hot water outlet: 11 Lt
- Gas type: LPG / NG
- Control: mechanic knobs
- Display: LCD

#### > MAIN FEATURES:

- Natural flue type
- Power and temperature selector
- LCD display to adjust temperature accurate
- Efficient combustion system
- Flue gas discharge control device
- Electronic ignition with flame detection by ionization
- Output regulation from 40% to 100%
- SOFT START device for progressive and silent ignition
- Safety device to protect against insufficient water pressure Also certified for operation on propane-air max gas (50% air 50% G31)
- Startup with low water supply pressure
- Anti-freezing drain device / valve

# WALL-HUNG INSTANTANEOUS GAS WATER HEATER, OPEN FLUE, BATTERY IGNITION

- Very **compact** dimensions
- Compact heat exchanger made completely of copper, protected by an atoxic aluminium coating, inside a cooled combustion chamber
- Wide range of temperature regulation
- Certified also for operation with **butane** (G30) or **LPG** (G31)
- **Graphic display** indicating temperature, battery charge level, burner status
- Operated by 2 X 1,5V, type «A» batteries, located in a box easily accessible from the bottom of the water heater
- Double knob for output selection and temperature setting
- Burner in stainless steel, specially shaped for silent operation
- Ready for domestic hot water production in combination with solar collectors systems

# ARGOS INSTANTANEOUS GAS WATER HEATER, OPEN FLUE, WITH PILOT FLAME

- **Burner.** To adapt it to different gases, it is sufficient to exchange the injectors. (With stainless steel heads specially designed for the combustion of butane/propane and natural gases)
- Piezoelectric front igniter
- Temperature and power selector switch
- **Special hydraulic arrangement.** It automatically activates the water heating mechanisms whenever a hot water tap is opened. It is also SAFE, since it opens the passage of gas to the burner only when water flows through the heat exchanger.
- **Built-in flue draught extractor.** It ensures a correct combustion, whatever the variation of the draught in the exhaust duct (chimney). A safety device stops the unit in the event of abnormal flue evacuation.
- **Ignition safety valve.** Thermo-electric system, which allows the gas to flow in the burner only when the pilot flame is ignited.
- Automatic water flow regulator
- Flexible hot water connection

- C Hot water outlet: R 1/2".
- F Cold water inlet: R 1/2".
- $\textbf{G1} \ \, \textbf{Butane/propane inlet:} \ \, \emptyset \ \, \textbf{12 mm ext}.$
- $\textbf{G2} \text{ Natural gas inlet: } \emptyset \text{ 12 mm ext.}$

# **TITANO SMART BF**

# MID CAPACITY ELECTRIC WATER HEATERS ENERGY SAVER

Electrical water heaters with extremely high efficiency storage, vertical and horizontal configuration with **50 to 150-litre capacity.** 

#### > EQUIPPED WITH:

- "SMART" electronic control able to optimise consumption according to user requirements
- Control panel with **LED lights** for reading the operating temperatures and operating status and convenient **keys** for managing the water heater
- Ultra high performing "Blue Forever" electrical heating elements featuring a special surface treatment that almost entirely reduces limescale build-up on the element for optimal operation over time
- Magnesium anode tank protection
- **5-bolt** flange to guarantee sturdiness and easy periodic maintenance
- Safety valve calibrated to 8 bar
- Supplied with three-pole electric cable without plug

#### **VERSIONS:**

**VE** - vertical, **HO** - horizontal CABLE / PLUG as option Elements: 0.8 - 2 kW

For all the models some customized version might be available on request, subject to minimum order quantity, for this refer to your sales representative.

#### > KEY

- Status signal LED:
   Green LED: Electrically powered storage tank
   Red LED: Storage tank in DHW production
   Flashing green LED: Antilegionella

# TITANO BF MID CAPACITY ELECTRIC WATER HEATER

- Temperature control by mechanical thermostat
- High-concentration magnesium anode to protect the tank
- Five bolt flange to ensure sturdiness and easy periodical maintenance
- Unbreakable thermometer in ABS
- On/off light
- Pressure relief valve set to 8 bars
- Manual outside temperature adjustment (vertical model)
- "Blue Forever" heating element. Its surface is treated through a special patented process, which
  permits drastical reduction of limestone deposits

#### **BLUE FOREVER**

#### THE SCALING ENEMY

The element is enameled with Bluesilicon, a unique patented treatment, offering extra qualities such as:

- Drastically reducing the limestone deposit, which substantially shortens the life span of the element
- Top efficiency of the element for a longer period
- Maintaining the high performance throughout the life span of the element
- Extended Ferroli warranty on the element

#### **VERSIONS:**

VE - vertical, HO - horizontal CABLE / PLUG as option Elements: 0.8 - 2 kW

For all the models some customized version might be available on request, subject to minimum order quantity, for this refer to your sales representative.

# **CALYPSO**

#### **MID CAPACITY ELECTRIC WATER HEATER**

- Five bolt flange of wide diameter, to ensure sturdiness and easy periodical maintenance
- Various models with capacity from 50 to 150 litres, both vertical and horizontal
- Five bolts flange element
- Temperature control through mechanical thermostat with probe
- Magnesium anode to protect the tank
- Temperature level indicator
- On/off light indicator
- Pressure relief valve set to 8 bar
- Manual external temperature adjustment (vertical model)

#### **VERSIONS:**

VE - vertical, HO - horizontal

CABLE / PLUG as option Elements: 0.8 - 4 kW - copper/stainless steel

For all the models some customized version might be available on request, subject to minimum order quantity, for this refer to your sales representative.

#### **HORIZONTAL**

Recommended in confined spaces like false ceilings

#### **VERTICAL**

Maximum stratification. Withdrawal of hot water from the warmest point in the tank

## **CALYPSO ECO**

## MID CAPACITY ELECTRIC WATER HEATER

- The element is  $\mbox{\bf screw-fixed}$  together with the magnesium anode, to the tank
- Various models with capacity from 50 to 150 litres, both vertical and horizontal
- Container internally enameled with Titanium Bluesilicon process
- Temperature level indicator
- On/off light indicator
- Pressure relief valve set to 8 bar

#### **VERSIONS:**

VE - vertical, HO - horizontal CABLE / PLUG as option

Elements: 0.8 - 4 kW - copper/stainless steel

For all the models some customized version might be available on request, subject to minimum order quantity, for this refer to your sales representative.

#### **REGULATION**

INTERNALThrough the internal knob, removing the plastic cover. It is however factory pre-set in order to get maximum possible efficiency (EU regulation 812/2013). A proper setting ensures a high water flow at mixed 40°C temperature. Factory adjustment depends on volume and execution of the heater. 60°C preset on VG 100÷150 and HO 80, 70°C on the others.

| VERTICAL EXECUTION  |               |         | 50 VG   | 80 VG   | 100 VG  | 120 VG  | 150 VG  |

## **CALYPSO MT**

## MID CAPACITY ELECTRIC WATER HEATER WITH AUXILIARY COIL

- Multi-energy water heater: includes a copper electric heating element and coil for indirect heating from a external source
- Electric or auxiliary heating can operate individually or simultaneously
- Horizontal execution or vertical one, the latter available with 2 or 6 coils exchanger
- High-concentration magnesium anode to protect the tank
- Five bolt flange to ensure sturdiness and easy periodical maintenance
- Pressure relief valve set to 8 bar
- Manual outside temperature adjustment (vertical model)
- Hydraulic connections for auxiliary heating can be on the right on left side of the appliance
- Combined heating system through electric heater and auxiliary coil represent the quickest solution to heat DHW
- Mixed water heater is a flexible solution, which permits the user to choose, in winter period,
   between quick combined operation, or economic mode exploiting only the auxiliary
   coil, fed by an external heating source

#### **VERSIONS:**

VE - vertical, HO - horizontal CABLE / PLUG as option

**Elements:** 0.8 - 4 kW - copper/stainless steel

For all the models some customized version might be available on request, subject to minimum order quantity, for this refer to your sales representative.

## **CALYPSO XL**

## ELECTRICAL WATER HEATERS COMMERCIAL RANGE

CALYPSO XL covers the needs of big residential plants or commercial applications for collective leisure, restauration, lodging facilities.

- Copper element
- Range: Model 200 litres vertical / horizontal
- Internal regulation
- Setpoint temperature can be modified through the internal knob, removing the plastic cover.
- It is however factory pre-set in order to get maximum possible efficiency according to European regulation 812/2013
- A proper setting ensures a high water flow at mixed 40°C temperature.
- Vertical model is adjusted at 70°C whereas the horizontal one at 60°C
- Oversize thermal insulation (33 mm)
- 5 bolts flange

#### **VERSIONS:**

VE - vertical, HO - horizontal CABLE / PLUG as option

For all the models some customized version might be available on request, subject to minimum order quantity, for this refer to your sales representative.

## **HE 150-300**

#### **BIG CAPACITY EHW SINGLE TANK FLOOR STANDING 1 SERIES**

- Capacity: 150, 200, 300L
- Power
- **150L** (1.5 kW) (Floor standing)
- 200L (3 kW) (Floor standing)
- **300L** (4 kW) (Floor standing)
- Interface: thermometer
- Control: product body control

#### **MAIN FEATURES**

- High efficiency stainless steel heating element
- Health blue silicon coating
- Glasslined tank
- Large and double magnesium anode
- Unique design of Mg installation
- Drain pipe Extra TP valve (optional)
- Power indicate led
- Temperature setting

## **HE 400-500**

#### **BIG CAPACITY EHW** HALF AND FULL TANK HEATING

- Capacity: 400, 500L (Floor standing)
- Power: 3 kW + 3 kW
- Interface: thermometer
- Control: product body control

#### **MAIN FEATURES**

- Half and full tank heating, via single or double element operation
- 50 mm insulating layer
- High efficiency stainless steel heating element
- Health blue silicon coating
- Glasslined tank
- Large and double magnesium anode
- Unique design of mg installation
- Drain pipe
- Extra TP valve (optional)
- Power indicate led
- Temperature setting

# BRAVO ELECTRICAL WATER HEATERS SMALL LITRE CAPACITY

- Range of 5 models with 10, 15 and 30 litre capacities
- 10 and 15-litre models available in versions for installation over and under the sink

#### > EQUIPPED WITH:

- Stainless steel electrical heating elements
- Glass-porcelain storage tank
- High concentration magnesium anode
- External temperature regulator
- Plastic external casing
- \* UNDER SINK
- Capillary temperature-control thermostat

## **RITA FS DE**

## INSTANTANEOUS ELECTRIC WATER HEATER

- Red copper heating element, inside glassfiber box
- Power level automatically managed by temperature sensor and PCB
- Lcd indicates shower duration, advises flow reduction need, advises shower head cleaning
- Overheating protection
- Self diagnosis
- Hidden electric installation
- Range: 3,0 kW / 5,0 kW / 7,5 kW / 8,5 kW / 10,0 kW / 12,0 kW

| MODEL                       | RITA FS DE              |  |
|-----------------------------|-------------------------|--|
| Power                       | 220 ~ 240 Vac, 50/60 Hz |  |
| Protection                  | IP24                    |  |
| Min. water flow rate        | 1,6 - 1,8 lts/min       |  |
| Water pressure              | 0,3 - 8 bar             |  |
| Max temperature             | 52°C                    |  |
| Plumbing connections        | 1/2"                    |  |
| Product dimension H x W x D | 280 x 177 x 95 mm       |  |

## **MITO SMD**

## INSTANTANEOUS ELECTRIC WATER HEATER

- Copper heating element
- Seven work mode
- Color screen LED display
- ELCB device for extra electric protection (optional)
- Self diagnosis
- Low water pressure starting
- Hidden electric installation
- Range: 5,0 kW / 6,5 kW / 7,7 kW / 8,5 kW

| MODEL                       | MITO SMD                |  |
|-----------------------------|-------------------------|--|
| Power                       | 220 ~ 240 Vac, 50/60 Hz |  |
| Protection                  | IP24                    |  |
| Min. water flow rate        | 1,8 lts/min             |  |
| Water pressure              | 0,3 - 6 bar             |  |
| Plumbing connections        | 1/2"                    |  |
| Product dimension H x W x D | 280 x 177 x 94,5 mm     |  |
| Weight                      | 1,85 kg                 |  |

## **AMORE**

MOD. GSN

MOD. GSP

MOD. GDP

#### **INSTANTANEOUS SLIM ELECTRIC WATER HEATER**

- Luxury black glass
- Elcb (Earth Leakage Circuit Breaker)
- Energy saving
- Multiple protections
- WxHxD =  $240 \times 360 \times 75$ mm
- Power: 4500 w 220-240v/50hz

#### AMORE MOD. GSN

- Control: power selector
- Temperature stabilizer
- Flow switch sensor
- Splash proof
- Thermal safety cut-out

#### AMORE MOD. GSP

- Control: power selector
- Temperature stabilizer
- Flow switch sensor
- Splash proof
- Thermal safety cut-out
- Super silent pump
- Booster pump

#### AMORE MOD. GDP

- Control: touch button
- Electronic control 4 memory setting
- Colorful led display
- Temperature dtabilizer
- Splash proof
- Thermal safety cut-out
- Super silent pump
- Booster pump

#### **INSTANTANEOUS ELECTRIC** WATER HEATER

- Compact tankless electric water heater, 220~240 Vac, 50/60 Hz
- Instant production of DHW. Supplied flow depends on  $\Delta T$  required (cold water temperature) and viceversa
- Power settable in 3 steps
- Simple analogue, mechanichal operation, via regulation/safety thermostat, pressure/flow switch, ignition microswitches

| MODEL                  |               | DFF-KAM 3.0S          | DFF-KAM 5.0S | DFF-KAM 5.5S   |  |  |  |

# SYSTEM COMPONENTS

#### **TEMPERATURE CONTROLS**

BASIC TEMPERATURE CONTROLS 120 EVOLVED TEMPERATURE CONTROLS 121

Products in this chapter are not involved at all in ERP regulation, or are marginally involved. As a consequence they can be freely installed in EU, upon respect of local laws.

## TEMPERATURE CONTROLS BASIC FOR ALL MODELS OF BOILERS

**BRIDGE** \*

Receiver for Wireless version

#### > OSCAR W (ON/OFF PROGRAMMABLE THERMOSTAT)

- Weekly programming, max 6 periods a day
- Preset standard program, which can be completely customised
- Manual mode available
- Relay with voltage-free contact (24 to 230 V)
- Operated by 2xAA type batteries
- Extra functions for all models: pump anti-seize, pre-heating, holiday, week-end, party
- Phone contact input, for remote boiler switch on/off
- Model **RF** features **wireless** transmission to boiler's control board

#### **COMPATIBILITY**

Opentherm-ready boilers / ON-OFF operated boilers / SUN P N

| CODE     | DESCRIPTION                                   |

# TEMPERATURE CONTROLS EVOLVED ONLY FOR BOILERS THAT CAN BE COMBINED WITH REMOTE CONTROL

AX5200SQ

#### > CASCADE CONTROLLER

- this can manage a cascade of one to five boilers
- the request to switch on the individual modules is made through a direct communication bus with the individual boilers
- the operating power of each boiler is managed directly by the regulator according to the load required by the
- through the outdoor probe it can manage the flow temperature compensation of the heating system
- the kit consists of a regulator, an external temperature probe and a probe for the system flow temperature

| CODE             | DESCRIPTION                    |  |
|------------------|--------------------------------|--|
| 1Κ\//\/\/\/\H18Δ | CASCADE MODILI E CONTROL LINIT |  |

#### > FZ4 B ZONING CONTROLLER

- board for systems with zones (max 3) two of which are mixed and one is direct, operating in combination with both modulating control timers and ON/OFF programmable thermostats
- it manages delivery temperatures that are sliding and differentiated between the zones

013013X0 FZ4 B BOARD FOR SYSTEMS WITH ZONES

## TEMPERATURE CONTROLS EVOLVED ONLY FOR BOILERS THAT CAN BE COMBINED WITH REMOTE CONTROL

Control

RF/Wifi receiver

## > CONNECT wifi modulating remote control with programmable thermostat function

- Remote control to manage comfort in the home even from Smartphone
- Connection to the home WiFi network for internet access through the supplied RF/WiFi receiver.
- CONNECT APP available for switching the boiler on and off and managing home comfort for heating/DHW via remote control from Smartphone (iOS and Android)
- With the APP it is possible to remotely control boilers in «evolved» mode via the OpenTherm connection and in «basic» mode through the ON/OFF connection.
- Modulating regulation of the delivery temperature with ambient climatic compensation, for boilers connected via OpenTherm («evolved»).
- Modulating regulation of the delivery temperature with climatic compensation through external temperature (detected by the internet or by an optional outdoor probe), for boilers connected via OpenTherm («evolved»).
- It improves the average seasonal efficiency in room heating by +4% if combined with boilers via the OpenTherm connection.
- Room regulation with ON/OFF programmable thermostat operation, for boilers connected via on/off («basic»)
- Weekly hourly programming in 30-minute intervals (via APP CONNECT).
- Reading of the external temperature from the internet (via APP CONNECT) or from an optional outdoor probe (if installed)
- Alarm display also through CONNECT APP
- Operating mode: Off, Holiday, Automatic, Manual.
- Three modifiable temperature levels: Comfort, Economy, Antifrost
- Battery status indicator (also from APP CONNECT)
- Supplied material: 2 x 1.5V AAA batteries, table stand, 230 Vac power supply unit, boiler connection USB cable, set of wall fixing screws, user manual.

Receiver for Wireless version

#### > ROMEO W (MODULATING REMOTE CONTROL)

- weekly programming, max 6 periods per day
- heating delivery and domestic hot water temperature settings
- external temperature display and possibility of working at sliding temperature with outdoor probe (optional)
- modulation of the delivery temperature according to the room temperature
- boiler on off reset
- phone contact input
- Models: W wired W RF with Wireless transmitter
- $\blacksquare$  A System: Romeo and the outdoor probe, combined with a Ferroli boiler with seasonal efficiency  $\eta_s$  94%, constitute a heating system with labelling A\* (scale from G to A \*\*\*)

# **RADIATORS**

PROTEO-PROTEO HP 124 XIAN 125 EUROPA C 126 TAL 127 VARESE 128 STEEL PANEL RADIATOR 129 RIMINI 130

Products in this chapter are not involved at all in ERP regulation, or are marginally involved. As a consequence they can be freely installed in EU, upon respect of local laws.

# PROTEO-PROTEO HP PRE-CAST ALUMINIUM RADIATORS

#### > PRODUCT FEATURES

- Pre-cast aluminium radiators assembled with nipples and gaskets in sets of 4 to 10 elements
- Painted white (RAL 9010)
- A careful study of the shapes has made it possible to obtain particularly effective convective exchange fins, with one of the highest thermal efficiencies on the market.
- The packaging consists of four corner pieces in thick cardboard, protected by a heat-shrinkable nylon cover. IT was designed to be able to install the radiator without removing the cardboard corners in order to protect it until the work is completed.
- The HP models (600 and 700) are built with a reinforced structure capable of running at high operating pressures, up to a maximum of 16 bar.

## XIAN

#### DIE-CAST ALUMINIUM RADIATORS

- Die-cast aluminium radiator with 2 front convective fins
- Elegant design of the rounded top head. Besides aesthetic appearance of the rounded edge and along with the gradual curve of the convective fins alloy a uniform distribution of warmed air, without turbulences and air flows towards the wall
- 6 bar as maximum operating pressure
- Blocks are assembled in factory in units from 2 to 12 sections
- Sections are assembled each other in the factory via an inorganic elastic joint, with unbeatable resistance to high temperature and pressures, dilatations, circuit additives, chemical gaseous reactions in the heating system. This results in the maximum watertightness of the radiator itself.

## **EUROPA C**

- Die-cast aluminium radiator with flat surface
- It is is the ideal smart solution which fits perfectly with any style of furniture, thanks to its sober and elegant design
- 6 bar as maximum operating pressure
- Blocks are assembled in factory in units from 2 to 12 sections
- Each section is painted individually through expoxy powder coating: this results in a brilliant surface, resistant to heat throughout the years
- Sections are assembled each other in the factoy via an inorganic elastic joint, with unbeatable resistance to high temperature and pressures, dilatations, circuit additives, chemical gaseous reactions in the heating system. This results in the maximum watertightness of the radiator itself.

#### > PRODUCT FEATURES

TAL is an aluminium design radiator, consisting of vertical extruded bars and die cast heads. The modern design gives it wide flexibility of use while the accuracy and careful construction guarantee high quality and durability.

- Consisting of aluminium die cast heads and extruded bars
- Exclusively supplied in inseparable modules of 2 or 3 elements
- Using nipples and OR gasket (optional), the modules can be assembled in groups tailored to your needs
- Reversible up/down (not front/rear). Used both in traditional and single-pipe installations
- Maximum operating pressure 10 bar
- 1" gas connections
- Painted white RAL 9010

## VARESE HIGH EFFICIENCY RADIATOR

#### > PRODUCT FEATURES (version HE)

- High performance radiator particularly suitable for low temperature systems in combination with condensing boilers
- Finned copper/aluminium heat exchanger with low water content, sized to optimise forced air draught with particularly silent brushless fans, each mounted with four silent blocks
- 4 operating modes, "Automatic", "Eco", "Comfort" and "High emission", through a control panel with easy-to-read backlit buttons
- Reversible RH / LH single-pipe and two-pipe connection outlets
- Depth of 119 mm completely flush with the wall on two heights, respectively 635 mm and 350 mm
- Pained RAL 9016 with removable front panel for cleaning and maintenance
- Compact and elegant design (especially mod. LP under-window)

(Also available in non HE version, without fans)

Auto Mod.: automatic fan speed selection
 Eco Mod.: Fan at minimum speed
 Comfort Mod.: Fan at medium speed
 High Emission Mod.: Fan at maximum speed

## FERROLI STEEL PANEL RADIATOR 4 OR 6 CONNECTIONS

- 5 types, 5 heights
- 20 different lenghts between 400 3000 mm
- 4 or 6 connections radiators for a total choice of 1000 models
- Optionally equipped with compact plug or insert regulation valve
- Easy-to-clean thanks to removable top grills and side covers
   Convectors are directly welded on the wet ducts of the radiator to minimize thermal losses and get maximum performance
- Protected against damages during transport and storage by strong packaging system
   Ferroli steel panel radiators are equipped as a standard in the package with wall brackets, fischer screws, one blind pug and one air vent. For 6-connection-radiators, such accessories are available upon request

#### **ELECTRIC OIL RADIATOR**

#### > PRODUCT FEATURES

- Electric oil radiator and aluminium closed-plate elements
- Delivered complete with wall mounting kit

- PID regulation control with TRIAC cutting system, for improved temperature stability
   Large high-resolution LCD screen (FTF) for easier parameter reading
   Settable operating modes: Stand-by, Comfort, Economy, Antifrost, Programming, Manual
- Daily and weekly programming in Comfort, Economy and Antifrost mode, in  $\frac{1}{2}$  hour time slots
- Keyboard blocking system (child safety)
- Open windows function: automatic shutdown in case of sudden drop of 4°C over a period of 20
- Optional remote control

# ECOTECH HD SYSTEM THERMOSYPHON SYSTEM (NATURAL CIRCULATION) FOR TERRACE INSTALLATION

#### > PRODUCT SPECIFICATIONS

- Complete system: flat collector, tank, hydraulic fittings, collector connection pipes, 8 bar pressure safety valves with non-return valve on cold water inlet; safety valve 1,7 bar solar primary circuit

#### **COLLECTOR FEATURES**

- Flat collectors with high efficiency
- Structure of the tub collector in dark painted aluminum
- Highly selective aluminum absorber with titanium oxide treatment
- Tempered glass, prismatic with high transparency

#### **TANK FEATURES**

- Storage tank for domestic hot water, with external cavity on the primary circuit side.
- Enamel surface on water side. Rigid insulation of 40 mm thickness and external finish in painted
- Supplied in standard configuration with magnesium anode and electrical integration resistance

IMPORTANT NOTES: It is mandatory to install an expansion vessel on the hydraulic line of domestic hot water (at the inlet point before the storage tank) to protect the tank and the circuit in the house from pressure shocks, and to compensate overpressure in the solar storage tank which may damage or hamper the durability of flexible connection pipes into the house.

## **ECOTECH G SYSTEM**

## THERMOSYPHON SYSTEM (NATURAL CIRCULATION) FOR TERRACE INSTALLATION

#### > PRODUCT SPECIFICATIONS

 Complete system: flat collector, tank, hydraulic fittings, collector connection pipes, antifreeze liquid (pure glycol to be mixed), 10 bar pressure safety valves with non-return valve on cold water inlet; safety valve 1,7 bar solar primary circuit

#### **COLLECTOR FEATURES**

- Flat collectors with high efficiency, natural circulation
- Structure of the tub collector in dark painted aluminum
- Highly selective aluminum absorber with titanium oxide treatment
- Tempered glass, prismatic with high transparency
- 22 mm connection / interconnection connections on the four corners of the panel

#### TANK FEATURES

- Storage tank for domestic hot water, with external cavity on the primary circuit side.
- Enamel surface on water side. Rigid insulation of 40 mm thickness and external finish in painted sheet steel
- Supplied in standard configuration with magnesium anode and electrical integration resistance

| TANK FEATURES                   |               |                  | 150   | 200         | 300          | 300 H       |

**IMPORTANT NOTES:** It is mandatory to install an expansion vessel on the hydraulic line of domestic hot water (at the inlet point before the storage tank) to protect the tank and the circuit in the house from pressure shocks, and to compensate overpressure in the solar storage tank which may damage or hamper the durability of flexible connection pipes into the house.

## SOLAR COMPACT KIT PRE-ASSEMBLED SOLAR PACKAGE

#### SINGLE-BLOCK KIT COMPOSED OF

- Pre-assembled circulation unit with: 1/2" safety valve, flow meter with flow regulator, system
  fill and drain valves, shut-off valve and pressure gauge set, solar circulator, shut-off valve, solar
  control unit, expansion tank for 18-lt solar circuit
- Solar control unit integrated with self-diagnosis function and reading of solar circuit temperature with probes (1 PT1000 probe + 1 NTC)
- Double coil storage tank
- ECOTOP VHM-N 2.1 flat solar collector with non-reflective prismatic glass (vertical and horizontal installation)
- 3/4" M threaded connecting / interconnecting fittings
- Set-up for electrical heating element, 1" 1/2 fitting
- Only the monoblock can be purchased: storage tank, pump unit, control unit, vessel, model BL 200 / 300

## FORCED CIRCULATION FLAT SOLAR COLLECTOR VERTICAL AND HORIZONTAL INSTALLATION

#### > PRODUCT FEATURES

- High efficiency flat manifolds with forced circulation
- Tank collector structure in dark painted aluminium
- Frames available for **flat roof** and **sloped roof** (optional)
- Highly selective aluminium absorber with titanium oxide treatment
- High transparency, prismatic tempered glass
- Compliant with standard EN 12975 with "Keymark" quality certification
- ø 3/4" M threaded connecting/interconnecting fittings

## **VERTICAL SOLAR CABINET**

## PRE-ASSEMBLED VERTICAL CABINET FOR FORCED SOLAR SYSTEMS

ERP

#### Multi-functional solar vertical cabinet pre-assembled with:

24-It solar circuit expansion vessel, 1/2"safety valve, 18-It DHW circuit expansion vessel, flowmeter with flow regulator, system fill and drain valves, shut-off valve and pressure gauge set, high efficiency ErP solar circulator, shut-off valve, solar control unit with self-diagnosis function and set-up for solar energy metering and reading of solar circuit temperatures with probes.

Dimensions of the solar vertical cabinet: (L x H x D= 400x1085x330). External connection pipes not supplied

| MODEL | VERTICAL SOLAR CABINET |

| CODE  | OX2030XA               |

## **SYSTEM ACCESSORIES**

### > IDRO - circulation unit

IDRO 6-E

- High Efficiency ErP Circulator
- Set-up for housing the
- Ecotronic Tech regulating control unit (optional) with digital probe temperature reading function
- System filling and draining valve (excluding mod. 70)
- Needle thermometers for system flow and return provided as per standard
- Kit for wall-hung brackets
- Expanded polypropylene insulation
- Expansion vessel fitting
- Safety unit with safety valve and pressure gauge
- Flow regulator valve with read-out
- Safety valve calibration pressure 6 bar
- Check valve provided as per standard
- Complete with manual air vent (excluding Idro 6-E) (it is advisable to install a air vent with a shut-off valve on the solar field)

| MODEL *                   |       | 6-E         | 12-E        | 30-E        | 70-E        |
|---------------------------|-------|-------------|-------------|-------------|-------------|
| Dimensions (LxHxD)        | mm    | 155x425x150 | 308x434x169 | 308x434x169 | 285x500x170 |
| Fittings nominal diameter |       | 3/4"M       | 1"M         | 1"M         | 1"1/4 M     |
| Min/max flow rate         | I/min | 1 - 6       | 2 - 12      | 8 - 28      | 20 - 70     |
| Max operating pressure    | bar   | 8           | 8           | 8           | 8           |
| CODE                      |       | 0X2022XA    | 0X2021XA    | 0X2023XA    | 0X2027XA    |

<sup>\*</sup> to select the IDRO unit, the maximum number of connectable collectors (after checking the pressure drops) will be calculated with the following formula:

Coll. No. = [ I/min. idro unit x 60 min. / nominal coll. flow rate / effective coll. surf.] where the nominal flow rate is: 45 I/h/m² for small d.h.w. domestic hot water production systems with flat collectors (High Flow); 30 I/h/m² for small d.h.w. domestic hot water production systems with vacuum pipe collectors; 15 I/h/m² for large surface systems (Low Flow)

**EXAMPLE:** IDRO 12-E and ECOTOP VHM-N flat collectors mod. 2.1 (1.83  $m^2$  effective surf.), the calculation is: 12 x 60 / 45 / 1.83 = 8.74 collectors

#### > EXPANSION VESSEL

- For high temperatures
- Resistant to high pressures
- Membrane for anti-freeze liquid
- Models 50 and 80 equipped with floor-standing feet

#### > IMPORTANT

never close expansion vessels with shut-off valves

## **SYSTEM ACCESSORIES**

#### > ECOTRONIC TECH regulating control unit

| MODEL | ECOTRONIC TECH |
|-------|----------------|
| CODE  | 0X3002XA       |

- Control unit for solar thermal systems for domestic hot water production with management of solar fields with single exposure or double exposure, the latter by means of a double pump or single pump/hydro and double two-way valve but with external double-input relay (not supplied) that controls the pump when the control unit opens either of the valves
- Self-diagnosis function and set-up for solar energy metering
- Polyvalent luminous display screen with system graphic symbols
- Supplied complete with 3 temperature probes as per standard (2 x PT1000 1 x NTC)
- Power supply range: 210-250 Volt
- Management of integrative heating (boiler) with temperature probe
- Output for the control of any collector-covering shutter (anti-stagnation)

(storage tank high temperature: ex. managing integration from boiler)

PT 1000 (supplied with ECOTRONIC TECH \*: 2.5 m cable; 40 mm head) to manage integration with boiler directly from the solar control unit

NTC (if the probe is cabled in the boiler) Note: if integration is managed at the top of the storage tank by wiring the probe in the boiler, it is necessary to use the optional NTC probe: art. 1KWMA11W

\* not included in the standard supply of the "solar vertical cabinel kit" - in this case to manage the integration it is necessary to purchase a PT 1000 probe separately (art. 043007X0) and connect it to the ECOTRONIC TECH control unit or an NTC probe (art. 1KWMA11W) and connect it to the boiler

(storage tank low temperature: solar differential probe)

NTC (supplied with ECOTRONIC TECH, 2.5 m cable; 32 mm head)
S3 (delivery from the solar field)

PT 1000 (supplied with ECOTRONIC TECH, 2.5 m cable; 40 mm head)

S4 Solar energy metering \*\*

NTC (optional \*\*\* : art. 1KWMA11W; 2 m cable, 32 mm head)

\*\* only with flow meter accessory (not supplied) - function not implemented in the "solar vertical cabinet" kit \*\*\* except for the "solar vertical cabinet" KIT where it is provided as per standard and already wired with variable flow

management function
S5 (double exposure/double solar field management)

PT 1000 (supplied) Note: this option is not compatible with the S1 probe wiring on Electronic Tech (in fact that PT 1000 probe is used as S5 instead of S1) and it is not compatible with the use of S4 (in fact this option is not feasible with the "forced solar vertical cabinet" where there is already S4)

#### THERMOSTATIC MIXER

- Adjustment range: 30-65°C
- Limescale thermostatic mixer, adjustable
- 1/2" diameter, chrome-plated
- Compliant with EN 12165
- Max inlet temperature: 100°C
- Maximum operating pressure: 5 bar
- Two check valves included

| DIMENSIONS (mm) |    |     |     |      |      |

### > PROSUN / PROSUN PLUS Premixed solar fluid

Specific heat transfer fluid ready for use for solar systems with high summer temperatures and moderate risk of frost. Specific **premixed** product based on demineralised water, non-toxic propylene glycol with antifreeze function and thermostable corrosion inhibitors at the stagnation temperatures typical of solar collectors. When the colour of the fluid changes from blue to yellow, it means it needs to be changed.

**PROSUN / PROSUN TP:** Antifreeze function up to -15°C **PROSUN PLUS:** Antifreeze function up to -27°C

| MODEL | PROSUN TP - 2 x 5 KG | PROSUN - 25 KG | PROSUN PLUS - 25 KG |
|-------|----------------------|----------------|---------------------|

## **FASTENINGS FOR SLOPED ROOFS**

#### > UNIVERSAL CAPTIVE BARS

Stainless steel fastening system with captive bar (M12x250 mm) for ECOTECH N/G (all models)\*, ECOTOP.

Stainless steel fastening system with self-tapping bar for wood (M12x120 mm) for ECOTECH N/G (mod. 150 and 200), ECOTOP.

Specific kit for fastening on concrete tiles, bituminous tiles, flat or corrugated metal roofing; can also be used for all other types of roofing and tiles with a captive (lock nut required under-roof) or self-tapping bolt for wood (requires fischer plug).

\* For installation on roof pitch, purchase 1 kit code 076172X0 plus 1 kit for additional collector code 076176X0 (mod. 250)

| THREADED | 1ST COLLECTOR | ADDITIONAL COLLECTOR |
|----------|---------------|----------------------|

## ECOGEO H-1 P INTEGRATED DHW STORAGE TANK FOR HEAT PUMP

#### > PRODUCT FEATURES

ECOGEO H-1 P is a vertical hot water storage tank.

This unit is designed to heat domestic hot water in combination with a heat pump.

The units can be equipped with a series of electric heaters as an additional source of heating.

Steel tanks (\$235.IR) manufactured with placed steel, which can be inspected through a flange inspect.

Steel tanks (S235JR) manufactured with glazed steel, which can be inspected through a flange installed at the top of the tank and featuring fixed single heat exchanger.

The tank is protected by a layer of porcelain glaze that guarantees a long service life.

The glazing and magnesium anode sizing processes (provided as standard) observe DIN 4753

50 mm expanded polyurethane insulation and external ABS grey RAL 9006

Hygienic certificate WRAS

# ECOGEO H-2 PC INTEGRATED DHW STORAGE TANK FOR HEAT PUMP AND BOILER

#### > PRODUCT FEATURES

ECOGEO H-2 PC is a vertical hot water storage tank.

This unit is designed to produce domestic hot water in combination with a heat pump and a traditional gas boiler.

The units can be equipped with a series of electric heaters as an additional source of heating. Steel tanks (S235JR) manufactured with glazed steel, which can be inspected through a flange installed at the top of the tank and featuring fixed double heat exchanger.

The tank is protected by a layer of porcelain glaze that guarantees a long service life. The glazing and magnesium anode sizing processes (provided as standard) observe DIN 4753. 50 mm expanded polyurethane insulation and external ABS grey RAL 9006

## ECOGEO H-2 SP DHW STORAGE TANK FOR USE WITH HEAT PUMPS AND SOLAR THERMAL SYSTEMS

#### > PRODUCT FEATURES

ECOGEO H-2 SP is a vertical hot water storage tank.

This unit is designed to produce domestic hot water in combination with a heat pump and a solar circuit. The units can be equipped with a series of electric heaters as an additional source of heating.

Steel tanks (S235JR) manufactured with glazed steel, which can be inspected through a flange installed at the top of the tank and featuring fixed double heat exchanger.

The tank is protected by a layer of porcelain glaze that guarantees a long service life.

The glazing and magnesium anode sizing processes (provided as standard) observe DIN 4753.

50 mm expanded polyurethane insulation and external ABS grey RAL 9006

Hygienic certificate WRAS

# ECOUNIT F SINGLE/DOUBLE COIL STORAGE TANKS

#### > PRODUCT FEATURES

- Vertical storage tanks for DHW, with single coil **(version 1C)** or with double coil **(version 2C)**, in enamelled steel.
- Glass-porcelain steel storage tank, 50mm rigid insulation and external finish of grey painted steel sheeting
- Supplied in standard configuration with magnesium anode and integrating electrical heating element of 1500W and adjustable from 15°C to 75°C
- Fitting for recirculation

# **ECOUNIT H**

#### STORAGE TANKS FOR STORAGE **OF DHW**

#### > PRODUCT FEATURES

ECOUNIT H is a vertical hot water storage tank designed for domestic hot water heating. The units can be equipped with a series of electric heaters as a source of heating. Enamelled steel tank (S235JR) with 200 to 3000-litre capacity which can be inspected through a flange installed at the bottom of the tank.

The tank is protected by a layer of porcelain glaze that guarantees a long service life. The magnesium anode sizing process (provided as per standard) observes DIN 4753 P.3. Thermal insulation is achieved through PU direct foam for models up to 500 litres. Hard PU jackets for the 750 and 1000 lt models and polyester fibre for the 1500 to 3000 lt models. The outer casing is made with coupled PVC.

Hygienic certificate WRAS

# **ECOUNIT H-1**

# STORAGE TANKS WITH SINGLE COIL

#### > PRODUCT FEATURES

ECOUNIT H-1 is a vertical single-coil hot water storage tank.

This unit is designed for heating domestic hot water with one energy source and a DHW system, compatibly with the performance and power characteristics.

Enamelled steel tanks (S235JR) with 750 to 3000-litre capacity which can be inspected through a flange installed at the bottom of the tank and featuring one fixed heat exchanger.

These models are used for the production of domestic hot water with a source of solar energy or boiler. The tank is protected by a layer of porcelain glaze that guarantees a long service life.

The glazing and magnesium anode sizing processes (provided as standard) observe DIN 4753 P.3. Hard PU jackets for the 750 and 1000 lt models and polyester fibre for the 1500 to 3000 lt models. The outer casing is coupled PVC.

# ECOUNIT H-2 VERTICAL HOT WATER STORAGE TANK WITH DOUBLE COIL

#### **ERP**

#### > GENERAL CHARACTERISTICS

 ${\tt ECOUNIT~H-2} \ is \ a \ vertical \ DHW \ storage \ tank \ with \ double \ coil.$ 

This unit is designed for heating domestic hot water to a temperature below boiling point at atmospheric pressure. Indirect heating by two energy sources.

Enemelled steel (S235JR) tanks, with capacities from 200 to 3000 liters. It can be inspected through a flange placed on the lower part of the tank.

These models are used for the production of domestic hot water through solar thermal and a boiler. The tank is protected by a layer of porcelain enamel that guarantees a long life.

The enamel process and sizing of magnesium anodes (supplied as standard) are made according to

The thermal insulation is obtained by direct foamed PU for models up to 500 lt.

Rigid PU shells are used for the 750 and 1000 lt models and polyester fiber for models from 1500 to 3000 It.

The exterior jacket is made of coupled PVC

Hygienic certificate WRAS

#### > PRODUCT FEATURES

Tank-in-tank carbon steel tanks with 800/200, 1500/300 capacity equipped with a single fixed exchanger, with a second internal vitrified carbon steel tank, according to DIN 4753 P.3.

They are externally insulated by the application of an outer casing of soft polyurethane th.  $100 \ \text{mm}$ .

This type of storage tank is used for the production of domestic hot water and heating.

- Possibility of using the system as a multi-energy "puffer" with the parallel connection of several sources (ex. boiler + solar + heat pump or thermo-fireplace)
- Corrugated AISI 316L STAINLESS STEEL semi-rapid exchanger for the production of domestic hot water
- 6 probe pits + 1 for electrical heating element
- 100 mm soft PU insulation
- Double low speed controlled stratification system for the connection of the low and medium temperature system return
- No galvanic anode required (d.h.w. production is obtained with the AISI 316 stainless steel semi-rapid internal exchanger) and relative maintenance

# ECOPUFFER HY INERTIAL TANK WITH THERMAL FLYWHEEL FUNCTION FOR ALTERNATIVE ENERGIES

ERP

#### > PRODUCT FEATURES

- Raw carbon steel tanks S235JR with capacity 25-50-100 I, for the storage of technical water for heating and/or cooling
- Insulated externally by a casing in rigid PU 50 mm
- Energy class BOutside cladding in PVC
- 3 probe thermowells

#### TANK FOR THE STORAGE **OF TECHNICAL WATER**

- Raw carbon steel tanks S235JR without exchanger with capacity from 500 lt up to 5000 lt, for the storage of technical water
- Insulated externally with a 100 mm-thick polyester spunbond non-woven fabric (VLIES) outer casing
- Energy class C up to and including 500-litre capacity External anti-corrosion coating
- 3 probe pits

# EGEA HT WATER HEATER WITH HEAT PUMP FOR FLOOR STANDING INSTALLATION WITH POSITIVE AIR TEMPERATURES

#### **APPLICATIONS**

The air can be ducted to direct the flow appropriately for the various situations.

#### Use of energy that already exists in theenvironment (POWER PLANT OR LAUNDRY ROOM)

#### > GENERAL CHARACTERISTICS:

- Air heat pump and integrated storage tank for the production of domestic hot water with inlet air temperature range not lower than 4°C
- Possibility of ducting exhaust air
- Floor-standing installation
- Available operating modes: Eco, Auto, Boost, Electric, Fan
- Wi-Fi board installed as standard and smartphone control via the "Euea Smart" App
- 1500 W Electrical heater fitted in
- Simple and intuitive touch control panel on board the machine
- Enamelled steel water storage tank with 50 mm polyurethane insulation
- Main aluminium heat exchanger outside of the tank
- Anti-corrosion protection with magnesium anode
- Programmable anti legionella cycle
- Set-up (digital input) for activation with availability of photovoltaic energy
- Set-up (digital input) for activation with preferential electricity tariffs
- Ecological gas R134a

The simple and intuitive programmable control system on the machine allows you to select between different Operating Modes: **Eco**: only the heat pump (Max setpoint 62°C) / **Auto**: heat pump with electrical heater as possible support (Max setpoint 62°C) / **Boost:** heat pump and electrical heater in simultaneous mode (Max setpoint 75°C) / **Electric:** only electrical heater (Max setpoint 75°C) / **Fan:** only active ventilation.

The electronics of **EGEA are able to optimise** the integration of energy from other sources, thereby exploiting the possible availability of photovoltaic electricity.

The electronics of EGEA are able to optimise the integration of energy coming from other sources: it starts and exploits any over-production of **photovoltaic electrical energy** and raises the temperature of the water in the storage tank to the value set by the user (max 75°C).

#### CONNECTIVITY

Thanks to the "Egea Smart" App, which can be downloaded to the smartphone, Egea can be fully managed by modifying its parameters and operating modes

Egea

Ferroli

#### **LIMITS OF USE**

**Temperature range**. The graph below indicates the temperature range of the produced air and water, which guarantees correct operation.

#### **POWER SUPPLY VOLTAGE RANGE**

The table below provides the admissible variation conditions for the electrical power supply

| Standard power supply    | 230-1-50  | V-ph-Hz |
|--------------------------|-----------|---------|
| Admissible voltage range | 207 - 254 | V       |

#### **GENERAL TECHNICAL DATA**

# WATER HEATER WITH HEAT PUMP FOR HUNG AND FLOOR STANDING INSTALLATION WITH NEGATIVE AIR TEMPERATURES

#### **APPLICATIONS**

The inlet or outlet air can be ducted to direct the flow appropriately for the various situations.

#### Use of energy that already exists outside

#### > GENERAL CHARACTERISTICS:

- Air heat pump and integrated storage tank for the production of domestic hot water
- Active defrosting system to function correctly down to an air temperature of -7°C
- Ecological gas **R290** for mod. 90-120 and **R134a** for mod. 200-260
- Possibility of ducting exhaust air
- Hung (mod. 90-120) and floor-standing installation (mod. 200-260
- Electrical heater fitted in (1500 W base 1200 W wall hung)
- Available operating modes: Eco, Auto, Boost, Electric, Fan
- Wi-Fi board installed as standard and smartphone control via the "Egea Smart" App
- Simple and intuitive **touch control panel** on board the machine
- Enamelled steel water storage tank with 50 mm polyurethane insulation
- Main aluminium heat exchanger outside of the tank
- Set-up with **solar coil** ("LT-S" version).
- Double anti-corrosion magnesium anode (mod. 200-260)
- Programmable anti legionella cycle
- Set-up (digital input) for activation with availability of photovoltaic energy
- Set-up (digital input) for activation with preferential electricity tariffs
- Set-up (digital input) for **combination with solar thermal systems** ("LT-S" models).
- Integrated management of solar thermal system with forced circulation ("LT-S" models).

The simple and intuitive programmable control system on the machine allows you to select between different Operating Modes: **Eco:** only the heat pump (Max setpoint 62°C) / **Auto:** heat pump with electrical heater as possible support (Max setpoint 62°C) / **Boost:** heat pump and electrical heater in simultaneous mode (Max setpoint 75°C) / **Electric:** only electrical heater (Max setpoint 75°C) / **Fan:** only active ventilation. The electronics of EGEA are able to manage and optimise the integration of energy coming from other sources: it stops the heat pump when **solar thermal energy** (LT-S models) is available, it starts and exploits any over-production of photovoltaic electrical energy and raises the temperature of the water in the storage tank to the value set by the user (max 75°C). The LT-S models can be combined with a solar thermal system, regardless if it is managed by its own control unit or if the electronics of EGEA can manage the components of the solar circuit directly.

#### CONNECTIVITY

Thanks to the "Egea Smart" App, which can be downloaded to the smartphone, Egea can be fully managed by modifying its parameters and operating modes.

**LIMITS OF USE** 

## App Store

Temperature range. The graph below indicates the temperature range of the produced air and water, which guarantees correct operation.

#### **POWER SUPPLY VOLTAGE RANGE**

The table below provides the admissible variation conditions for the electrical power supply

| Standard power supply    | 230-1-50  | V-ph-Hz |
|--------------------------|-----------|---------|
| Admissible voltage range | 207 - 254 | V       |

# **OMNIA HYBRID C**

# REVERSIBLE HYBRID AIR-WATER HEAT PUMPS FOR SPLIT INSTALLATION WITH INSTANTANEOUS DHW PRODUCTION

- The family of OMNIA HYBRID C hybrid heat pumps integrates the technology of the heat pump and the condensing boiler with instantaneous dhw production in a single compact product.
- This represents the ideal solution for replacing old existing boilers, also on high temperature system with radiators.
- The **compact dimensions**, similar to those of a wall-hung boiler, make it easier to replace without losing significant space or requiring significant restructuring work.
- Internal electronics, by running the boiler or the heat pump as the climatic conditions vary, optimise the
  output of the system by always working in the most economic consumption-related modes possible.
- During heat pump operation in heating or conditioning mode, the boiler can produce dhw at the same time without interfering on heat pump operation, thereby maximising the comfort of both services.
- If the heat pump is partially or fully blocked, the boiler can operate separately in heating and dhw production.
- IT IS composed of an external inverter unit available in 3 power sizes associated with an internal condensation unit with integrated hydronic module for cooling circuit control.
- A highly versatile system that can operate in particularly cold climatic conditions (outdoor air down to -20°C).
- The split cooling circuit avoids the risk of freezing in particularly cold outdoor applications.
- The user interface is composed of a digital remote controller equipped with a large display and simple setting controls.

#### > CHARACTERISTICS OF EXTERNAL UNIT:

- Approved for outdoor operation in completely exposed site.
- Breakaway starting current thanks to Inverter technology.
- Compressor with twin rotary DC INVERTER motor on vibration damping supports and wrapped in double layer of soundproofing material to reduce vibrations and noise to a minimum.
- The compressor is also equipped with **casing oil heating element.**
- Two-flow electronic expansion vessel, cycle inversion valve.
- Axial fans with brushless DC motor complete with protective grids.
- Outdoor air temperature probe already installed on the unit.

#### > CHARACTERISTICS OF INTERNAL UNIT:

- A particularly sturdy boiler, suitable for replacements even in particularly critical and resistant systems.
- Combustion module with high modulation range (1:10) with high thickness stainless steel primary exchanger, with larger passes maintaining high efficiency even on old systems with oxidation and soiling
- M.G.R: Methane, LPG, Propane air Ready, with a simple configuration the internal unit can run on natural gas, lpg without the use of any additional conversion kits.
- MC<sup>2</sup>: Multi Combustion Control, combustion system with gas-adaptive patented technology for better
  adaptability of use to the varying gas network conditions (ex. pressure fluctuations or drops)
- F.P.S: Flue gas Protection System. The standard flue gas check valve offers easy connection to pressurised collective flue systems
- Particularly suitable for operation in flues requiring "heavy duty" pipes thanks to approval for
  operation with flue gas exhaust with a diameter of 50mm.
- Can be combined with preheating systems for the domestic hot water.
- Place of installation: also for outdoor use in a partially protected place that is up to -5°C, as standard

#### > THE CONTROL SYSTEM

- Comprised of a wired-remote digital controller (max 50 m from the I.U).
- Heating and cooling system: for single-zone systems it is possible to use the control unit as a room thermostat.
- Energy sources: the boiler can be started in Integration or Replacement of the heat pump and also if the heat pump is not working.
- Silenced mode: according to a programmed schedule, this reduces the maximum frequency of the compressor
  and the fan speed, to reduce the generated noise and the power absorbed by the unit.
- Eco Mode: possibility of defining a time slot in hot mode where the heat pump runs with a sliding setpoint
  defined by the chosen climatic curve. There are 8 climatic curves for low temperature systems (radiant floor) and 8
  climatic curves for fan coil or radiator systems).
- Weekly programming: this makes it possible to set a different schedule for each day of the week defining the
  operating mode for each time slot (COLD/HOT) and the work setpoint.

NOTE: Efficiency class calculated according to European regulation 811/2013. The values refer to units without any optional features or accessories.

\* SWL = Sound power levels, referring to 1x10<sup>-12</sup> W with unit operating in ATW55 conditions

The Total sound power level in dB(A) is measured in accordance with standard ISO 9614. The Total Sound Power in dB(A) which is therefore the only binding sound data. The sound pressure levels are values calculated from the sound power level (SWL) by applying the relations of ISO-3744.

# omnia Hybrid H

# AIR-WATER REVERSIBLE HYBRID HEAT PUMPS FOR SPLIT INSTALLATION, COMBINABLE WITH EXTERNAL DHW STORAGE TANK

#### > GENERAL CHARACTERISTICS:

- The family of OMNIA HYBRID H hybrid heat pumps integrates the technology of the heat pump and the heating-only condensing boiler in a single compact product
- It is the ideal solution for new builds and «major» renovations
- The **compact dimensions**, similar to those of a wall-hung boiler, make it easier to replace without losing significant space or requiring significant restructuring work.
- The internal electronics, by turning on the boiler or heat pump as the climatic conditions vary, optimise the
  efficiency of the system by always running in the most economically convenient modes in terms of
  consumption.
- During heat pump operation in heating or in conditioning, the boiler can simultaneously produce DHW
  in the external DHW storage without interfering on the operation of the heat pump, thereby maximising the
  comfort of both services.
- If the heat pump is partially or fully blocked, the boiler can operate separately in heating and dhw production.
- IT IS comprised of an inverter external unit available in 3 power sizes associated to an internal condensation unit with integrated hydronic module to control the cooling circuit.
- A highly versatile system that operates in particularly cold climatic conditions (outdoor air down to -20°C).
- The split cooling circuit avoids the risk of freezing in particularly cold outdoor applications.
- The user interface is comprised of a digital remote controller equipped with a large screen and simple settings controls

#### > CHARACTERISTICS OF THE EXTERNAL UNIT:

- Approved for outdoor operation in completely exposed site.
- Breakaway starting current thanks to Inverter technology.
- Compressor with twin rotary DC INVERTER motor on vibration damping supports and wrapped in double layer of soundproofing material to reduce vibrations and noise to a minimum.
- The compressor is also equipped with casing oil heating element.
- Two-flow electronic expansion vessel, cycle inversion valve.
- Axial fans with brushless DC motor complete with protective grids.
- Outdoor air temperature probe already installed on the unit.

#### > CHARACTERISTICS OF INTERNAL UNIT:

- Combustion module with high modulation range with high thickness stainless steel primary exchanger with larger passes that maintains high efficiency even on old systems with oxidation and fouling.
- M.G.R: Methane, LPG, Propane air Ready, with a simple configuration the internal unit can run on natural gas, lpg without the use of any additional conversion kits.
- MC<sup>2</sup>: Multi Combustion Control, combustion system with gas-adaptive patented technology for better adaptability of use to the varying gas network conditions (ex. pressure fluctuations or drops)
- F.P.S: Flue gas Protection System. The standard flue gas check valve offers easy connection to pressurised collective flue systems
- Particularly suitable for operation in flues requiring "heavy duty" pipes thanks to approval for operation with flue gas exhaust with a diameter of 50mm.
- Place of installation: also for outdoor use in a partially protected place that is up to -5°C, as standard

#### > THE CONTROL SYSTEM

- Comprised of a wired-remote digital controller (max 50 m from the I.U).
- **Heating and cooling system:** for single-zone systems it is possible to use the control unit as a room thormostat
- Energy sources: the boiler can be started in Integration or Replacement of the heat pump and also if the heat pump is not working.
- Silenced mode: according to a programmed schedule, this reduces the maximum frequency of the compressor
  and the fan speed, to reduce the generated noise and the power absorbed by the unit.
- Eco Mode: possibility of defining a time slot in hot mode where the heat pump runs with a sliding setpoint
  defined by the chosen climatic curve. There are 8 climatic curves for low temperature systems (radiant floor)
  and 8 climatic curves for fan coil or radiator systems).
- **Weekly programming:** this makes it possible to set a different schedule for each day of the week defining the operating mode for each time slot (COLD/HOT) and the work setpoint.

NOTE: Efficiency class calculated according to European regulation 811/2013. The values refer to units without any optional features or accessories.

\* SWL = Sound power levels, referring to 1x10<sup>-12</sup> W with unit operating in A7W55 conditions

The Total sound power level in dB(A) is measured in accordance with standard ISO 9614. The Total Sound Power in dB(A) which is therefore the only binding sound data. The sound pressure levels are values calculated from the sound power level (SWL) by applying the relations of ISO-3744.

# OMNIA H AIR-WATER REVERSIBLE HEAT PUMPS FOR SPLIT INSTALLATION

ERP

#### > GENERAL CHARACTERISTICS:

- The OMNIA H family of heat pumps meets the needs of winter and summer air-conditioning and the production of domestic hot water of small and medium power residential and commercial installations.
- IT IS comprised of an external inverter unit available in various power sizes associated with an internal hydronic unit available in two variants with or without electrical integration of 3kW two-stage (1.5 + 1.5), or 6 kW (models 12T and 16T) both equipped as per standard with integrated three-way valve for the production of domestic hot water via external storage tank.
- The system is very versatile and able to work at outdoor air temperatures of -20°C and to produce hot water up to 60°C with the aid of electrical integration.
- Particularly suitable for use in radiant systems, fan coils, radiators and for the indirect production of domestic hot water (DHW) through an external storage tank (not supplied).
- The split cooling circuit avoids the risk of freezing in particularly cold outdoor applications.
- The user interface is comprised of a digital remote controller (with a max length of wire of 50 m from the internal unit) equipped with a large screen and simple settings controls.

#### > CHARACTERISTICS OF OMNIA H-UE EXTERNAL UNIT:

- Reduced breakaway starting current thanks to Inverter technology
- Compressor with twin rotary DC INVERTER motor on rubber vibration damping supports and wrapped in double layer of soundproofing material to reduce vibrations and noise to a minimum.
- The compressor is also equipped with casing oil heating element.
- Two-flow electronic expansion vessel
- Cycle inversion valve
- Axial fans with brushless DC motor complete with protective accident prevention grids
- Finned coil made with copper pipes and aluminium fins
- Outdoor air temperature probe already installed on the unit
- DHW storage tank water temperature probe supplied as per standard (installation by the installation technician)

#### > CHARACTERISTICS OF OMNIA H-UI INTERNAL UNIT:

- Available with electrical integration from 3kw (OMNIA HI-UI) or without integration (OMNIA H-UI)
- Hydraulic unit with 3-way diverter valve for DHW production supplied as per standard
- Water/gas exchanger with brazed stainless steel plates
- Low consumption plant circulator with brushless DC motor
- Automatic air vent
- Water differential pressure gauge
- Water pressure gauge
- Expansion vessel
- Safety valve
- Y water filter supplied as per standard (installation by the installation technician)

#### > THE CONTROL SYSTEM

- Comprised of a wired-remote digital controller (max 50 m from the I.U).
- HEATING AND COOLING SYSTEM: the compressor frequency is modulated to keep the temperature of the
  produced water at the established setpoint value. For single-zone systems the control unit can operate as a room
  thermostat.
- DOMESTIC HOT WATER PRODUCTION (DHW): upon request of the DHW temperature probe (supplied as per standard), operation is activated in hot mode to maintain the temperature of the DHW tank at the established setpoint value.
- ADDITIONAL ENERGY SOURCES: any electrical integration boiler or booster can be started in Integration or Replacement of the heat pump and also if the heat pump is not working.
- ANTILEGIONELLA FUNCTION: weekly antilegionella cycles can be set The heat pump must be integrated with DHW boiler or boiler electrical heating element.
- FAST DHW: this function prioritises DHW by activating all the energy sources available to bring the DHW tank to
  the established setpoint in the shortest possible amount of time.
- SILENCED MODE: according to a programmed schedule, this reduces the maximum frequency of the compressor
  and the fan speed, to reduce the generated noise and the power absorbed by the unit.
- ON/OFF REQUEST: the unit can be switched on and off by an external contact.
- HOT/COLD REQUEST: the unit can be started and stopped in cold or hot mode by 2 external contacts (ex the thermostat for the zone that manages the request for hot and cold / remote switch).
- ECO: possibility of defining a time slot in hot mode where the heat pump runs with a sliding setpoint defined by
  the chosen climatic curve. There are 8 climatic curves for low temperature systems (radiant floor) and 8 climatic
  curves for fan coil or radiator systems)
- WEEKLY SCHEDULE PROGRAMMING: this makes it possible to set a different schedule for each day of the
  week defining the operating mode for each time slot (COLD/HOT/DHW) and the work setpoint.
- Antifrost protection. Guaranteed down to -20°C outdoor air temperature thanks to the heat pump itself
- Working in hot mode, for the electric antifrost heating element (as per standard) and the electric booster (if installed).

The values refer to units without any optional features or accessories.

Data declared according to EN 14511: EER (Energy Efficiency Ratio) = ratio of cooling output in relation to absorbed power COP (Coefficient Of Performance) = ratio of heating capacity in relation to absorbed power A7W35 = source: air in 7°C D.B. 6°C W.B. / system: water in 30°C out 35°C A7W45 = source: air in 7°C D.B. 6°C W.B. / system: water in 30°C D.B. / system: water in 20°C out 7°C

NOTE: Efficiency class calculated according to European regulation 811/2013. The values refer to units without any optional features or accessories.

NOTE: Efficiency class calculated according to European regulation 811/2013. The values refer to units without any optional features or accessories.

\* SWL = Sound power levels, referring to 1x10<sup>-12</sup> W with unit operating in A7W55 conditions

The Total sound power level in dB(A) is measured in accordance with standard ISO 9614. The Total Sound Power in dB(A) which is therefore the only binding sound data. The sound pressure levels are values calculated from the sound power level (SWL) by applying the relations of ISO-3744.

#### **OPERATING LIMITS**

mod. 4 - 6

**NOTE ON DHW MODE:** Produced water temperature means the water temperature produced by the unit and not the DHW temperature available to the user which is a function of this parameter and of the surface of the coil of the DHW tank.

# OMNIA M 3.2 REVERSIBLE HEAT PUMP FOR OUTDOOR INSTALLATION WITH DC INVERTER COMPRESSOR

Can be installed in multiple "cascade" configuration with a "MASTER" unit (directly managed by the controller) up to 5 "SLAVE" units, also different in their output power

#### > GENERAL CHARACTERISTICS:

This series of air-water heat pumps meets the needs of winter and summer air-conditioning of small and medium power residential and commercial installations. All the units are suitable for outdoor installation and being able to produce water up to 65°C they can be used in radiant systems, fan coils, radiators and for the indirect production of domestic hot water (DHW) via an external boiler. The units are characterized by the use of a DC inverter compressor that modulates the supplied power and come complete with a hydronic kit composed of all the essential components for quick and safe installation. The units are characterised by high energy efficiency and reduced sound levels allowing them to be used as a single generator for the plant or integrated with other energy sources such as additional electric heating elements or boiler. All units are supplied as standard with a DHW water storage tank temperature probe (to be installed by the installer) and with an outdoor air temperature probe (already installed on the unit), to achieve climatic adjustment in heating and cooling.

For specific applications, the units can be installed in multiple "cascade" configuration with a "MASTER" unit (directly managed by the controller) up to 5 "SLAVE" units, also different in their output power. The preparation of the domestic hot water is left to the master unit, while in the event of a failure of one of the slave units the remaining ones may continue to work in a normal way.

All units are carefully built and individually tested in factory. Installation only requires electrical and hydraulic connections.

#### > THE CONTROL SYSTEM

The user interface consists of a remote wired controller (5 wires, max 50 mt length from the unit) that manages:

- **HEATING AND COOLING SYSTEM** Where the unit is the only heater. If the unit is running in hot or cold mode, it works by modulating the compressor frequency to maintain the temperature of the produced water at the established setpoint value. By mean of a parametrization value, it is possible to use the remote controller (e.g. for single zone heating circuits) as a room thermostat.
- **DOMESTIC HOT WATER PRODUCTION (DHW)** The unit starts in hot mode to maintain the temperature of a DHW storage tank at the established setpoint value. A 3-way diverter valve (not supplied) and a temperature probe (probe T5, supplied with cable length 10mt) are required to be inserted in a pit of the DHW tank.
- ADDITIONAL ENERGY SOURCES (boiler or electric heating element) Depending from the set values of the parametrization, these sources can be started in integration or replacement of the heat pump during operation in heating or for DHW production and if the heat pump does not work.
- **CASCADING FUNCTION** of multiple units. The master unit can control in cascade mode up to 6 different units (1 master, 5 slaves, also with different output power) with a single controller connected to the master unit. It is possible to assign the function of production of DHW to the master unit, while in the event of a failure of one of the 5 slave units, the remaining ones may continue to work normally.
- MANAGEMENT UP TO 2 HEATING CIRCUITS (1 DIRECT AND 1 MIXED). The unit is able to manage the circulation pumps (not supplied) of both 2 heating circuits and, only for the mixed circuit, the mixing valve (not supplied) and the water supply line temperature probe (not supplied).
- PHOTOVOLTAIC INPUT AND SMART GRID. The unit is equipped with 2 digital inputs to be connected with the signal coming from the photovoltaic system and from the electrical grid.

The logic of the management is the following:

- -if the digital PV input is closed, the unit starts the DHW mode with DHW setpoint = 70°C and (if available) will start the electrical heating element of the DHW storage tank. The unit is running in cooling/heating mode with the normal logic
- -if the digital PV input is open and the smart grid input is closed, the unit runs normally
- -if the digital PV input is open and the smart grid input is open, the unit deactivates the DHW mode and may run in cooling/heating mode for a limited period (set by a parameter), then will stop running
- REMOTE CONTROL OF THE UNIT VIA APP. (available for IOS and Android systems).
- DHW STORAGE TANK ELECTRIC HEATING ELEMENT In the DHW mode it is possible to manage an integration electric heating element in the DHW storage tank as integration of the heat pump, as antilegionella function, or as total backup in case of failure of the heat pump.
- **FAST DHW** This function can be started manually to prioritize DHW by bringing the DHW storage tank to the setpoint in the quickest possible time, by the use of all available energy sources (heat pump, electrical backup resistors, boiler).
- ANTILEGIONELLA FUNCTION Weekly anti-legionella cycles can be set. The heat pump must be integrated with DHW boiler or boiler electrical heating element.
- SILENCED MODE When on, according to a programmed schedule, it reduces the maximum frequency of the compressor and the fan speed, to reduce the noise generated and the power absorbed by the unit.
- **ON/OFF** with an external contact. The unit can be switched on and off by an external contact (e.g. by a room thermostat / remote switch). In this circumstance, the unit will run in the mode set by the control keyboard.
- **HOT/COLD** with 2 external contacts. The unit can be started and stopped in cold or hot mode by 2 external contacts (e.g. by a room thermostat / remote switch which manages the hot/cold request).
- ECO/COMFORT Possibility of defining time slots in hot and cold and relative setpoints for ECO and COMFORT modes
- WEEKLY SCHEDULE PROGRAMMING allows to set a different schedule for each day of the week defining the operating mode for each time slot (COLD/HOT/DHW) and the working setpoint.
- ANTIFROST PROTECTION. Guaranteed down to -20°C outdoor air temperature thanks to the heat pump itself working in hot mode, to the electric antifrost heating element (as per standard) and the electric booster (if installed).

#### CONTROL THROUGH CLIMA CONTROL DISPLAY (REM CC) Supplied as Per Standard

#### > COOLING CIRCUIT

This is contained inside the unit to facilitate maintenance operations, it is equipped with COMPRESSOR with twin rotary DC INVERTER motor to guarantee greater dynamic balancing and reduce

It is positioned on rubber antivibration supports and wrapped in a double layer of sound-absorbing material to reduce noise. The compressor is also equipped with oil casing heating element. The circuit is completed with BRAZE-WELDED STAINLESS STEEL PLATE HEAT EXCHANGER complete with antifrost heating element, AXIAL FANS WITH BRUSHLESS DC MOTOR complete with accident prevention safety grilles, finned coil made of copper tubes and aluminium fins. All units are equipped with variable fan speed control which allows operation at low outdoor temperatures in cooling and high outdoor temperatures in heating.

#### > HYDRAULIC CIRCUIT

Contained inside the unit to facilitate maintenance operations, it is fitted as per standard with LOW CONSUMPTION CIRCULATOR with brushless DC motor, water flow switch, automatic air vent, water pressure gauge, expansion vessel, safety valve, Y water filter (installation by the installation technician).

The plate heat exchanger and all the hydraulic circuit pipes are thermally insulated to prevent condensation and reduce heat loss.

#### > STANDARD ACCESSORIES

- PROBE for the integration of a supplementary heat source
- REMOTE CONTROLLER
- Y FILTER

<sup>\*:</sup> SWL = Sound power levels, with reference to 1x10-12 W with unit operating in conditions:

A7W35 = source: air in 7°C d.b. 6°C w.b. / plant: water in 30°C out 35°C

A35W18 = source: air in 35°C d.b. / plant: water in 23°C out 18°C

Max = at maximum conditions in heating / cooling mode

Sil. 1 = if silent level 1 active in heating / cooling mode

Sil. 2 = if silent level 2 active in heating / cooling mode

The Total sound power level in dB(A) measured in compliance with ISO 9614 standards.

#### **OPERATING LIMITS**

#### **COOLING MODE**

Operation range by heat pump with possible limitation and protection

#### **HEATING MODE**

Operation range by heat pump with possible limitation and protection

If IBH (backup heater) /AHS (boiler) setting is valid, only IBH/AHS turns on If IBH/AHS setting is invalid, only heat pump turns on

Maximum inlet water temperature line for heat pump operation

#### **DHW MODE**

Operation range by heat pump with possible limitation and protection

If IBH (backup heater) /AHS (boiler) setting is valid, only IBH/AHS turns on If IBH/AHS setting is invalid, only heat pump turns

Maximum inlet water temperature line for heat pump operation

**NOTE FOR DHW MODE:** outlet water temperature is the temperature of the water produced by the unit and not the DHW temperature available to the user; the DHW temperature is in fact a function of this parameter and of the coil surface of the DHW boiler.

#### **MINIMUM OPERATING AREA**

# RVL-I PLUS REVERSIBLE HEAT PUMPS FOR EXTERNAL INSTALLATION WITH DC INVERTER COMPRESSOR

### CONTROL THROUGH CLIMA CONTROL DISPLAY (REM CC)

#### > GENERAL CHARACTERISTICS:

This series of air-water heat pumps meets the needs of winter and summer air-conditioning of small and medium power residential and commercial installations.

All the units are suitable for outdoor installation and being able to produce water up to 60°C they can be used in radiant systems, fan coils, radiators and for the indirect production of domestic hot water (DHW) via an external boiler. The units are characterised by the use of a DC inverter compressor that modulates the supplied power and come complete with a hydronic kit composed of all the essential components for quick and safe installation. The units are characterised by high energy efficiency and contained sound levels allowing them to be used as a single generator for the plant or integrated with other energy sources such as additional electric heating elements or boiler.

All units are supplied as standard with a DHW water storage tank temperature probe (to be installed by the installer) and with an outdoor air temperature probe (already installed on the unit), to achieve climatic adjustment in heating and cooling. All units are carefully built and individually tested in factory. Installation only requires electrical and hydraulic connections.

#### > COOLING CIRCUIT

This is contained inside the unit to facilitate maintenance operations, it is equipped with **COMPRESSOR** with twin rotary DC INVERTER motor to guarantee greater dynamic balancing and reduce vibrations. It is positioned on rubber antivibration supports and wrapped in a double layer of sound-absorbing material to reduce noise. The compressor is also equipped with oil casing heating element. The circuit is completed with **BRAZE-WELDED STAINLESS STEEL PLATE HEAT EXCHANGER** complete with antifrost heating element, **AXIAL FANS WITH BRUSHLESS DC MOTOR** complete with accident prevention safety grilles, finned coil made of copper tubes and aluminium fins.

All units are equipped with variable fan speed control which allows operation at low outdoor temperatures in cooling and high outdoor temperatures in heating.

#### > HYDRAULIC CIRCUIT

contained inside the unit to facilitate maintenance operations, it is fitted as per standard with **LOW CONSUMPTION CIRCULATOR** with brushless DC motor, water flow switch, automatic air vent, water pressure gauge, expansion vessel, safety valve, Y water filter (installation by the installation technician). The plate heat exchanger and all the hydraulic circuit pipes are thermally insulated to prevent condensation and reduce heat loss.

#### > ACCESSORIES

- **ELECTRIC BOOSTER** Suitable for indoor installation, it consists of a power electric resistor = 3kW (230V-1-50) inserted inside a painted metal sheet box and complete with electrical command and control panel.
- RUBBER VIBRATION DAMPERS
- 60-LIT HORIZONTAL INERTIAL TANK

#### > THE CONTROL SYSTEM

The general control system monitors all the functions of the inverter system and correct compressor operation. It also incorporates regulation algorithms with predefined climatic curves that can be selected by the customer, the management of a DHW circuit, the setting of time slots for noise reduction at night, alarm signalling, pump block prevention and integration with external heat generators. The user interface consists of a remote wired controller that manages:

- **HEATING AND COOLING SYSTEM** If the unit is running in hot or cold mode, it works by modulating the compressor frequency to maintain the temperature of the produced water at the established setpoint value.
- **DOMESTIC HOT WATER PRODUCTION (DHW)** The unit starts in hot mode to maintain the temperature of a DHW storage tank at the established setpoint value. A 3-way diverter valve (not supplied) and a temperature probe (probe supplied) are required to be inserted in a pit of the DHW tank.
- ADDITIONAL ENERGY SOURCES (boiler or electric heating element) These sources can be started in Integration or replacement of the heat pump during operation in heating or for DHW production and if the heat pump does not work.
- DHW STORAGE TANK ELECTRIC HEATING ELEMENT IT IS possible to manage an integrating electric heating element and for the antilegionella function
- **FAST DHW** This function can be started manually to prioritise DHW by bringing the DHW storage tank to the setpoint in the quickest possible amount of time.
- ANTILEGIONELLA FUNCTION Weekly anti-legionella cycles can be set. The heat pump must be integrated with DHW boiler or boiler electrical heating element.
- **SILENCED MODE** When on, according to a programmed schedule, it reduces the maximum frequency of the compressor and the fan speed, to reduce the noise generated and the power absorbed by the unit.
- **ON/OFF** with an external contact. The unit can be switched on and off by an external contact.
- HOT/COLD with external contacts. The unit can be started and stopped in cold or hot mode by 2 external contacts (ex the thermostat for the zone that manages the request for hot and cold / remote switch).
- ECO/COMFORT Possibility of defining time slots in hot and cold and relative setpoints for ECO and COMFORT modes
   WEEKLY SCHEDULE PROGRAMMING this makes it possible to set a different schedule for each day of the week
   defining the operating mode for each time slot (COLD/HOT/DHW) and the work setpoint.
- ANTIFROST PROTECTION. Guaranteed down to -20°C outdoor air temperature thanks to the heat pump itself working in hot mode, to the electric antifrost heating element (as per standard) and the electric booster (if installed).

<sup>\*</sup> SWL = Sound power levels, referring to 1x10<sup>-12</sup> W with the unit operating in A7W35 conditions = source: air in 7°C D.B. 6°C W.B. / system: water in 30°C out 35°C. The Total sound power level in dB(A) is measured in accordance with standard ISO 9614. The Total Sound Power in dB(A) which is therefore the only binding sound data.

\*\* SPL = Sound pressure levels, referring to 2x10<sup>-5</sup> Pa. The sound pressure levels are values calculated from the sound power level (SWL) by applying the relations of ISO-3744.

## TERMINAL UNITS

**KEY OF SYMBOLS 200** 

### **FAN COIL**

JOLLY TOP I 182 JOLLY TOP 3V 186 JOLLY PLUS 2 190 SUPER FAN 194 FCM 196

Products in this chapter are not involved at all in ERP regulation, or are marginally involved. As a consequence they can be freely installed in EU, upon respect of local laws.

### **JOLLY TOP I**

# VN version VN version

### FAN COIL WITH CENTRIFUGAL FAN

### > GENERAL CHARACTERISTICS:

New series of fan coil units with centrifugal fan with high efficiency DC brushless motor. Characterised by a maximum depth of 200 mm in the cased models and a particularly attractive aesthetic line, they are intended for residential heating and air conditioning applications.

Available in 5 sizes with cooling capacities from 1.50 to 5.60 kW and air flow rates from 255 to 1190 m³/h. In the standard version they are proposed with a single 3-row coil to which can be combined as an accessory, in the case of 4-pipe systems, an additional 1-row coil.

Available in the two versions, VM with casing and VN without shell for recessed applications. The units can be installed in both vertical and horizontal positions.

The range of centrifugal fan coil units includes two versions; each of them is available in different capacities.

### VM - Fan coil unit with suction casing from below

Composed of a sheet metal casing, a supply grille with doors to access the control, if required, in thermoplastic material and a regenerable e air filter, placed on a metal frame housed on guides cut out in the lower part of the frame.

### VN - Fan coil unit without casing for recessed applications

Without cover casing with regenerable air filter, placed on a metal frame housed on guides cut out in the lower part of the frame.

### > UNIT SPECIFICATIONS

BEARING STRUCTURE It is made of galvanized sheet metal of adequate thickness.

There are slots at the rear to fix the unit. For models without a cover casing, there is a front mounted fan unit closing panel.

**HEAT EXCHANGE COIL** 3-row copper tube coil with aluminium fins blocked by mechanical expansion of the tubes. The manifolds in the upper part of the coil are equipped with air vents, while the lower part has a water drain tap\*. \*

The default hydraulic connection for the coil is on the LEFT. HoweverIT IS POSSIBLE TO turn the coil and modify it to the RIGHT (see Installation Manual)

**CONDENSATE DRIP TRAY** Made of thermoplastic material to avoid corrosion it allows the machine to be installed in either vertical or horizontal positions. In particular, in the horizontal installation, its shape makes it possible to collect the drops of condensate that form on the collectors during cold operation. The drain hole is made directly from the condensate drip tray and allows it to be removed during cold operation. It is present on both sides of the machine to facilitate the rotation of the coil.

**FAN MOTOR** The electric motor is a DC brushless type with continuous speed regulation at high efficiency and is directly coupled to the fans and cushioned by elastic supports.

**CENTRIFUGAL FAN** The fan unit consists of double inlet centrifugal fans with blades developed in length to obtain high flow rate at low speed.

AIR FILTER Easily removable and regenerable by simply washing with water.

**COVER CASING (VM only)** Made of steel sheet part painted with epoxy powder to ensure high resistance to corrosion and part in anti-UV thermoplastic material to ensure resistance to ultraviolet rays. The air diffusion grilles and the door to access the control panel, both made of anti-UV thermoplastic material are inserted in the upper part.

**HYDRAULIC CONNECTIONS** The connections, located on the left side, are of 34" gas female type. It is possible to rotate the coil, which is supplied as standard with left side connections, by moving the hydraulic connections to the right side.

### > INSTALLATION EXAMPLES

These new units are characterized by an elegant aesthetic design and multiple insertion possibilities in different types of installations.

The cased models can be wall-hung or recessed (raised or supported by feet), or suspended horizontally from the ceiling.

### **WALL-HUNG OR RECESSED INSTALLATION**

### SUSPENDED HORIZONTALLY FROM THE CEILING INSTALLATION

The models without casing are particularly suitable for vanishing solutions in recessed or in false ceilings.

### RECESSED INSTALLATION

### SUSPENDED HORIZONTALLY FROM THE CEILING INSTALLATION

### **CEILING-HUNG HORIZONTAL INSTALLATION**

### **JOLLY TOP 3V**

# VN version VN version

### FAN COIL WITH CENTRIFUGAL FAN

### > GENERAL CHARACTERISTICS:

New series of fan coil units with centrifugal fan with high efficiency DC brushless motor. Characterised by a maximum depth of 200 mm in the cased models and a particularly attractive aesthetic line, they are intended for residential heating and air conditioning applications.

Available in 5 sizes with cooling capacities from 1.50 to 5.60 kW and air flow rates from 255 to 1190 m<sup>3</sup>/h. In the standard version they are proposed with a single 3-row coil to which can be combined as an accessory, in the case of 4-pipe systems, an additional 1-row coil.

Available in the two versions, VM with casing and VN without shell for recessed applications. The units can be installed in both vertical and horizontal positions.

The range of centrifugal fan coil units includes two versions; each of them is available in different capacities.

### VM - Fan coil unit with suction casing from below

Composed of a sheet metal casing, a supply grille with doors to access the control, if required, in thermoplastic material and a regenerable e air filter, placed on a metal frame housed on guides cut out in the lower part of the frame.

### VN - Fan coil unit without casing for recessed applications

Without cover casing with regenerable air filter, placed on a metal frame housed on guides cut out in the lower part of the frame.

### > UNIT SPECIFICATIONS

BEARING STRUCTURE It is made of galvanized sheet metal of adequate thickness.

There are slots at the rear to fix the unit. For models without a cover casing, there is a front mounted fan unit closing panel.

**HEAT EXCHANGE COIL** 3-row copper tube coil with aluminium fins blocked by mechanical expansion of the tubes. The manifolds in the upper part of the coil are equipped with air vents, while the lower part has a water drain tap\*. \* The default hydraulic connection for the coil is on the LEFT. HoweverIT IS POSSIBLE TO turn the coil and modify it to the RIGHT (see Installation Manual).

**CONDENSATE DRIP TRAY** Made of thermoplastic material to avoid corrosion it allows the machine to be installed in either vertical or horizontal positions. In particular, in the horizontal installation, its shape makes it possible to collect the drops of condensate that form on the collectors during cold operation. The drain hole is made directly from the condensate drip tray and allows it to be removed during cold operation. It is present on both sides of the machine to facilitate the rotation of the coil.

**FAN MOTOR** The electric motor, protected from possible overloads, has three speeds with running capacitor always on, directly coupled to the fans and cushioned by elastic supports.

**CENTRIFUGAL FAN** The fan unit consists of double inlet centrifugal fans with blades developed in length to obtain high flow rate at low speed.

AIR FILTER Easily removable and regenerable by simply washing with water.

**COVER CASING (VM only)** Made of steel sheet part painted with epoxy powder to ensure high resistance to corrosion and part in anti-UV thermoplastic material to ensure resistance to ultraviolet rays. The air diffusion grilles and the door to access the control panel, both made of anti-UV thermoplastic material are inserted in the upper part.

**HYDRAULIC CONNECTIONS** The connections, located on the left side, are of 34" gas female type. It is possible to rotate the coil, which is supplied as standard with left side connections, by moving the hydraulic connections to the right side.

| MODEL           |            | DESCRIPTION   | 150 | 250 | 350  | 500 | 700 | CODE     |
| CMR-N           | 17.        | Switch for remote wall installation Comes with: - Selector for Summer / Off / Winter function - Selector for Min / Med / Max fan speed  | •   | •   | •    | •   | •   | 2C09A3P0 |
| CM FC 3V        | 8**<br>6** | On-board unit switches They allow to: 1. Turn the unit on or off by selecting Hot-Cold mode 2. Select the fan speed   | •   | •   | •    | •   | •   | 2CO9A3M0 |
| TE FC 3V        | * e A O O  | Thermostat with display for on-board installation Allows to: 1. Turn the unit on or off 2. Choose the hot-cold operating mode 3. Display the room temperature and set the setpoint 4. Select the fan speed 5. Set a timed on or off 6. Setting an ECO feature 7. Connect the unit to the modbus network for management via BMS 8. Obtain a "chiller call" or a "boiler call" via 1A/230 Vac clean contact   | •   | •   | •    | •   | •   | 2C09A3L0 |
| TERN-N          |            | Advanced thermostat for remote wall installation Comes with: - Selector for Off/Summer/Winter/Auto function - Selector for Min/Med/Max/Auto fan speed - Knob to set the required temperature Note: The selected temperature refers to a value indicated on the knob and not to an offset in relation to a predetermined value. For the wall-hung version: - yellow LED: on when the thermostat is powered - green LED: on when the cooling function is on - red LED: on when the heating function is on   | •   | •   | •    | •   | •   | 2CO9A400 |
| тс              |            | Consent thermostat (only for switch CMR and CM)   | •   | •   | •    | •   | •   | 2C09A420 |
| MP              | 2222       | Wall-hung master control  By means of the remote terminal, which can be installed on the wall and connected with three wires to the power module, it is possible to set all the operating parameters of the units. The display shows the room temperature (via an air probe integrated in the terminal) and the set-point, and features icons for indicating the state (on/off), operating mode (heating/cooling/auto), fan speed (1/2/3/auto). Through the 4 keys, it is therefore possible to change the state, the operating mode, the set-point, and the fan speed. The display also shows any operating errors. The terminal is used to control a single fan coil while, through a serial connection, it acts as a master terminal and is able to manage a zone of fan coils (maximum 16). | •   | •   | •    | •   | •   | 20704440 |
| 3V              |            | Power Module  Module to be installed on each unit, it is able to activate the three fan speeds as well as any hot and cold valves. Through a micro-switch, it is able to manage different system configurations, 2 or 4 pipes or solutions with electric resistance integration. It manages heating and cooling and accepts presence status inputs of the place to be air-conditioned. It receives the settings directly from Master controller or from a serial connection with other units belonging to a single group of terminals with Master Slave setting.  | •   | •   | •    | •   | •   | 2C09A410 |

### > INSTALLATION EXAMPLES

These new units are characterized by an elegant aesthetic design and multiple insertion possibilities in different types of installations.

The cased models can be wall-hung or recessed (raised or supported by feet), or suspended horizontally from the ceiling.

### WALL-HUNG OR RECESSED INSTALLATION

### SUSPENDED HORIZONTALLY FROM THE CEILING INSTALLATION

The models without casing are particularly suitable for vanishing solutions in recessed or in false ceilings.

### RECESSED INSTALLATION

### SUSPENDED HORIZONTALLY FROM THE CEILING INSTALLATION

### **CEILING-HUNG HORIZONTALINSTALLATION**

### JOLLY PLUS 2 TANGENTIAL FAN COILS WITH BRUSHLESS MOTOR

### > GENERAL CHARACTERISTICS:

Jolly tangential fan coils with high efficiency brushless motors. Characterised by a maximum depth of 131 mm and a particularly attractive aesthetic line, they are intended for residential heating and air conditioning applications. The range comes in three versions:

VM-F with outer casing for automatic opening of the intake section, VM-G with casing and fixed intake grid and VN without casing for recessed applications and are four sizes available with cooling capacity from 0.83 kW to 3.34 kW.

The careful design of the main components, the refined design and the versatility of the product make it suitable for any type of installation in residential, commercial or industrial environments. Installation therefore only requires electrical and hydraulic connections.

### > CONSTRUCTION FEATURES:

**BEARING STRUCTURE:** built with high thickness galvanised sheet metal, it integrates structural and functional plastic elements such as the condensate collection tray and the fan volute.

**THERMAL EXCHANGE BATTERY:** copper tube arranged in staggered rows to increase heat exchange and 2-row aluminium fins locked by the mechanical expansion of the tubes. The manifolds are equipped with air vents, holes for water drainage.

**CONDENSATE COLLECTION TRAY:** made of thermoplastic material to avoid corrosion, for the VN version (supplied as per standard) it allows the machine to be installed in either vertical or horizontal positions.

**FAN MOTOR:** the motor is high efficiency brushless type with rpm control. IT IS mounted on rubber supports to reduce noise transmission on the frame. The adjustment allows both continuous and discrete speed control depending on the selected control model. With the use of an accessory it is possible to discretize the speeds and make them steady so that they can then be guided by standard thermoregulators.

**FAN:** tangential fan coupled directly to the motor, in turn incorporated into an anti-vibration support. **AIR FILTER:** regenerated through simple washing with water, easily removable, built with polypropylene honeycomb mesh.

**COVERING CABINET (only VM-F and VM-G):** made entirely of epoxy powder-coated steel sheet to ensure high resistance to corrosion. The air diffusion grids are inserted in the upper part. The sides are easily removable for easy installation or access to all internal components. Available in the colour RAL 9003.

**AIR DELIVERY GRILL (only VM-F and VM-G):** built with painted aluminium in the same colour as the casing, it can be turned to allow the air to be directed towards the room or towards the wall.

#### **AIR INTAKE GRID**

**(VM-F version):** made of extruded aluminium, it is characterised by the two thermo-actuators that open it in parallel with fan start-up. It includes a micro switch that blocks the fan if the grid is removed for the normal filter cleaning procedure.

**(VM-G version):** also in extruded aluminium, it is fastened in the intake section and has fixed fins. It can be taken down to clean the filter.

**HYDRAULIC CONNECTIONS:** The units are equipped with ¾" EUROKONUS hydraulic connections that offer easy and safe connection. The units are fitted with standard LH connections, with an accessory the connections can be moved to the RH side.

### > CONTROLS

The available controls are divided into:

#### **CONTINUOUS CONTROLS**

To exploit the potential of the unit, special user terminals have been developed, equipped with continuous adjustment algorithms. This offers stability of the comfort conditions as well as savings linked to fan modulation, as well as a positive impact on the noise level of the unit itself. The terminals, to be ordered separately as accessories, are available in on-board machine version TC Plus or in remote wall version TC-R Plus.

Only for the **TC-R Plus** version, the possibility was developed to connect **up to 31 fan coil units** capable of operating in parallel. This solution is particularly suitable in medium to large sized environments with multiple units installed

**Associated Functions** Setting the desired temperature / AUTO function on the fan / SILENT function. (limits max. fan speed) / NIGHT TIME function. (limits the max fan speed and changes the set point) / MAX function (forces the maximum fan speed)

Other features Outputs for the control of the ON-OFF 230V valves / Independent dry contacts, for the control of a chiller and a boiler according to the room request / Dry presence contact (window contact or hotel room presence badge)

### **DISCRETE CONTROLS**

If you want to use fixed speed control, either an actual command can be installed that can be installed on **TS Plus** to control the room temperature and start the unit, or a board module for interfacing with electric fan motor **K3V Plus** which can be controlled by wall-mounted remote user terminal **TD-3R**, to be ordered separately as an accessory, or by a commercial thermostat equipped with three-speed output.

### **INSTALLATIONS**

Depending on the version, the following installations are possible:

|              | Wall-hung vertical or centre<br>of the room* on feet | Wall-hung<br>vertical | Vertical in recessed<br>installation | Ceiling-hung<br>horizontal  |
|--------------|--|-----------------------|--------------------------------------|-----------------------------|
| Version VM-F |  |                       |                                      |                             |
| Version VM-G |  |                       |                                      | exposed (with BO accessory) |
| Version VN   |  |                       |                                      | in false celling            |

## SUPER FAN FAN COIL WALL-HUNG

### **EC** motor

#### Valve 3-way

#### REM-

REM2-W

### > GENERAL CHARACTERISTICS

New series of wall-hung recessed fan coils.

Terminal units for air handling which, in combination with a chiller, a heat pump or a boiler, can be used either in the winter or in the summer.

Particularly flexible, they are suitable for satisfying air climatisation and air conditioning requirements for both hotel applications and a wide range of commercial and residential uses.

### > CONSTRUCTION FEATURES

Available in 4 models with **nominal cooling capacity from 0.99 to 4.38 kW and nominal heat output from 1.48 to 5.25 kW**, they are suitable for wall installation. The compact dimensions provide a pleasant visual impact. The covering cabinet built with **ABS** guarantees high mechanical characteristics and resistance to aging, and also acts as the supporting structure of the unit. The fan unit consists of a tangential fan with **low consumption EC motor**.

The units are equipped with a display showing the selected operating mode and the set room temperature.

To allow easy installation, all units in the series are equipped with flexible hydraulic hoses; they are also equipped with valves inserted inside the unit and easily accessible from the front panel.

The use of the three-way valve prevents excessive cooling of the unit when the fan stops, and the unpleasant formation of condensation on the casing of the machine.

The units are designed to be connected in **Master-Slave system** to control multiple units through a single controller.

### **AVAILABLE CONTROLS**

There are two options available for unit control. It is necessary to select at least one of the two. With Master-Slave control, at least one of the two controls must be selected for each installed group of units.

#### Infrared remote control REM-I

This sets all of the unit's essential functions. Equipped with an LCD display for easy and immediate display of all the active functions and the various parameters necessary for correct use.

The control comes with a support that fixes it in the most easily accessible position. It offers control up to a distance of 7 m

### Wired control for wall application REM2-W

This offers control over all machine parameters and measures the local temperature. With a Master-Slave system, this allows the individual control of each unit. It also acts as a receiver for the infrared remote control.

IT IS equipped with a specific extension that allows installation up to 7 m away from the unit.

NOTES:
(1) Water 7°C IN- 12°C OUT - Air 27°BS 19°C BU
(2) Water 50°C IN - Same flow rate in cold operation - Air 20°C BS
(3) Water 70°C IN - OUT 60°C - Air 20°C BS
(4) Sound pressure at 1 meter from the unit
(E) Eurovent certified data
Water side pressure drops are included in the valve drops.

### **FCM**

INFRARED REMOTE CONTROLLER (standard)

WIRED CONTROLLER (optional)

### FAN COIL CASSETTE

### **GENERAL SPECIFICATION**

- 2 versions for 2 pipes plant and for 4 pipes plant
- 4 model available for 2 pipes type and 2 model for 4 pipes type
- New EC motor with low consumptions up to 30% respect to a standard motor
- Controlled by infrared remote controller (standard) and a wired controller (optional)
- Timer setting
- Available function: Heating, Cooling, Dehumidification, Automatic

### **CONTROLLER**

#### **INFRARED REMOTE CONTROLLER (Standard)**

This controller is very easy to use and all parameters are under control. The limit trasmitting distance of this remote controller is 10 m. Already supplied with the unit.

### WIRED CONTROLLER (Optional)

This controller is very easy to use and all parameters are under control. In this case, the panel is fixed to the wall and connected to the unit by a wire.

### **OPTIONAL ACCESSORIES**

The following accessories are available for this category:

### 3-WAY VALVE KIT(obligatory for operation in the cooling mode)

The three-way valve is not only required to control the ambient temperature, but also to block the flow of chilled water to the coil should the level of condensed water in the tray rise in an abnormal way.

It is obligatory to install this valve if the unit is used for operation in the cooling mode. It avoids excessive cooling when fan is idle, thus preventing the unpleasant formation of condensation inside the machine.

The kit includes copper pipe connections and 3-way valve with ON/OFF electrothermic actuator, suitable for 230V power input. The valve is controlled by main board of the unit.

#### **DRIP TRAY**

This PVC tray collects and conveys outside condensation from pipe connections and 3-way valve kit (if present).

### **OPTION INSTALLATION**

### Fresh air flow input

For fresh air flow input there is a pre-cut hole to connect the unit to a circular duct. It is possible to control fresh air flow by an external fan (not included). This fan can be controlled by main board of the unit.

| 4 PIPES MODEL | 400-4 | 750-4            |

| Ø             | 65    | 75               |

### Air delivery into an adjacent room

On all sides there are pre-cut hole to connect the unit to adjacent rooms by some ducts.

# AIR CONDITIONING

**KEY OF SYMBOLS 200** 

### **DIRECT EXPANSION**

DIAMANT PLUS S 201 DIAMANT PLUS M 203 COMMERCIAL 3.2 208

### **KEY OF SYMBOLS**

Infrared remote control to control all of the functions of the DC air

Activated charcoal electrostatic filters provided

Anti-bacterial filters

SWING function (motorised deflecting fin)

Timer

Maintaining the memory and automatic restart-up n case of power outages

AUTO operating mode, enables Cool/Heat operation automatically based on room temperature and Set Point

DRY operating mode, it accentuates summer dehumidification phenomenon

FAN operating mode, starts the internal unit in ventilation only

Automatic fan speed regulation

Night operation (SLEEP). This increases night-time comfort by automatically adjusting fan speed and the set temperature

TURBO function brings operation to maximum load to reach the SET POINT quickly

Condensing drain pump on board the internal unit

Air ionisation

Can be connected with wall panel

Universal internal units combinable with external mono or multi split units

Frost Protection function, sets a minimum antifrost safety set point of  $8\,^{\circ}\text{C}$ 

I FEEL function for local reading of the room temperature

Direct current (DC) INVERTER technology
The direct current compressor installed on these units guarantees an
electromechanical efficiency of 30% more than TRADITIONAL
INVERTER (AC) compressors.

The products marked with this symbol are EUROVENT certified

R410A Eco Coolant. It observes the Montreal protocol, it does not damage the ozone because it is HCFC-free

R134A Eco Coolant. It observes the Montreal protocol, it does not damage the ozone because it is HCFC-free

R32 Eco Coolant. It observes the Montreal protocol, it does not damage the ozone because it is HCFC-free

The products are all ROHS-compatible according to Directive 2002/95/EC

155°C

Max temperature of produced water

Operating Mode in Cooling

Operating Mode in Healing

Auto Clean function, dries the internal battery after cold operation or dehumidification to avoid the formation of unpleasant odours

This guarantees cold operation also with outdoor temperature of -15°C  $\,$ 

Coolant leak signalling system

Self-diagnosis System and description of any anomalies

Remote control with dedicated smartphone App

Cold Catalyst" and "Biohepa" double filtered system

### **DIAMANT PLUS S**

### WALL-HUNG MONOSPLIT DC INVERTER IN HEAT PUMP

### > GENERAL CHARACTERISTICS:

- R32 Eco Coolant
- Efficiency Class A++ / A+
- Cold Catalyst" and "Biohepa" double filtered system
- Remote control with dedicated smartphone App
- Temperature display on board the machine
- Featuring direct current inverter technology
- Indoor unit with particularly appealing and modern design
- Outdoor unit equipped with fitting covers and sound-absorbent jacket
- Easily removable intake grille and filters for quick cleaning
- Automatic restart in case of a power outage
   Night operating mode / "AUTOMATIC" mode / Timer function
- Outdoor unit treated with protective anti-rust substances

### **DIAMANT PLUS M**

### WALL-HUNG MULTISPLIT DC INVERTER IN HEAT PUMP

### > GENERAL CHARACTERISTICS:

- R32 Eco Coolant
- Efficiency Class A++ / A+
- Cold Catalyst" and "Biohepa" double filtered system
- Remote control with dedicated smartphone App
- Temperature display on board the machine
- Featuring direct current inverter technology
- Indoor unit with particularly appealing and modern design
- Outdoor unit equipped with fitting covers and sound-absorbent jacket
- Easily removable intake grille and filters for quick cleaning
- Automatic restart in case of a power outage
- Night operating mode / "AUTOMATIC" mode / Timer function
- Outdoor unit treated with protective anti-rust substances

### LIMITS ON LENGTH AND GRADIENT OF COOLANT PIPES

The length of the coolant pipes between the indoor and outdoor units must be as short as possible, and is, in any case, limited by observing the maximum gradient between the units. As the difference in height between the units (H1, H2) and the length of the pipes (L) decrease, the pressure drops will decrease, thereby increasing the overall efficiency of the machine. Observe the limitations provided in the following tables

| OUTDOOR UNIT                                     |        |     | 14-2 | / 18-2 |      | 21-3 |      |      | 27-3 |      |      | 28   | -4   |      |
|--|--------|-----|------|--------|------|------|------|------|------|------|------|------|------|------|
| Diameter   | Liquid | ш   | 1/4" | 1/4"   | 1/4" | 1/4" | 1/4" | 1/4" | 1/4" | 1/4" | 1/4" | 1/4" | 1/4" | 1/4" |

NOTE: • combinations where the total power required by the indoor units is compatible with the rated output of the outdoor unit.
• combinations where the total power required by the indoor units is greater than the rated output of the outdoor unit. When there is a simultaneous request of power by all the connected units, the power available for the single units will be in line with the contents of the previous table.

<sup>•</sup> THE NOMINAL COMBINATIONS OF REFERENCE ARE HIGHLIGHTED IN BLUE.

### **COMMERCIAL 3.2**

### > GENERAL CHARACTERISTICS:

New range of Mono split units for Commercial applications able to cover the different types of installation, both in the centre of the room with circular air diffusion, NCS cassettes, in recessed version with low average useful heads up to 160 Pa, ducted MIDAS, and exposed in vertical floor standing installation or horizontal hung, AIR floor\ceiling.

The units are available in the heat pump version with external units equipped with DC Inverter technology with low environmental impact coolant R32.

mod. 48-60

**SPECIAL FUNCTIONS** 

### **EXTERNAL UNITS**

- Use of Inverter technology for greater energy savings and environmental comfort. Use of R-32 coolant which reduces the environmental impact by 68% compared to R-410A. Coolant flow control with electronic expansion valve.
- Single-phase (mod. 18, 24, 36 and 42) and three-phase (mod.48 and 60) power supply. Lighter and more compact outdoor units, mono-fan for powers up to 12 Kw, for easy installation on site. Coolant lines up to 30m (mod.18), up to 50m (mod.24) up to 65m (mod.36 - 60).

### AIR FLOOR STANDING\CEILING INSTALLED INTERNAL UNITS

- Available in 6 different capacities. Compact unit with a thickness of only 205 mm
   Possibility of horizontal ceiling or vertical wall installation.
- Infrared remote control provided by standard with generous display for complete control of the unit.

### **INTERNAL UNIT NCS CASSETTES**

- Available in 6 different capacities.
  360° air delivery for better distribution of the temperature in the room

- Integrated condensation discharge pump
   Set-up for fresh air intake or delivery into adjacent room through ducts
   Infrared remote control provided by standard with generous display for complete control of the unit.

### **DUCTABLE MIDAS INTERNAL UNITS**

- Available in 6 different capacities.
- Compact unit with a thickness of only 245 mm
- The head available up to 160 Pa makes it possible to use the unit with flexible ducting systems of various lengths.
- Possibility of setting a different useful head through wired control to optimise the flow rate of the air delivered into the room.
- Flexible installation: the direction of air intake can be changed from the rear side to the bottom.
- Wall-hung panel provided by standard with generous display for complete control of the unit.

### **CONTROLS**

There are two types of controls: wired and infrared. Depending on the units, one of the two is provided as standard. Using the controllers in addition to setting all of the typical functions which are generally run by the user, through specific functions, you can configure procedures that make machine installation easier (useful head available for ductable units) or functions for cleaning the units, or more.

### THE WIRED CONTROL IS STANDARD WITH:

### THE REMOTE CONTROL IS STANDARD WITH:

- AIR floor standing\ceiling installed units

### **FIELD OF APPLICATION**

The units can operate in the following temperature ranges:

| OPERATING MODE | PARAMETER                      |      | INTERN | IAL SIDE | EXTERN | IAL SIDE |
|----------------|--------------------------------|------|--------|----------|--------|----------|
|                |                                |      | B.S    | B.U      | B.S    | B.U      |
| Cooling        | Maximum intake air temperature | (°C) | 32     | 23       | 52     | \        |
| Cooling        | Minimum intake air temperature | (°C) | 16     | 15       | -15    | \        |
| Heating        | Maximum intake air temperature | (°C) | 32     | \        | 24     | 18       |
| Heating        | Minimum intake air temperature | (°C) | 16     | \        | -15    | -14      |

### **TABLE OF COMBINATIONS**

| REQUIRED INTERNAL UNITS |              |           |                        |        |  |  |  |  |  |
|-------------------------|--------------|-----------|------------------------|--------|--|--|--|--|--|
| SIZE                    | POWER SUPPLY |           | ТҮРЕ                   |        |  |  |  |  |  |
|                         |              | Cassettes | Floor standing\Ceiling | Ducted |  |  |  |  |  |
| 18                      |              | X         | Χ                      | X      |  |  |  |  |  |
| 24                      | 230-1-50     | X         | X                      | X      |  |  |  |  |  |
